

This is an official translation of the Regulation for Doctoral Studies, approved by by Order No. A-395 of KTU Rector of 29 June 2011. Lithuanian version of this Regulation prevails over this translation in case of dispute.

APPROVED
by Order No. A-395 of KTU Rector of 29 June 2011

KAUNAS UNIVERSITY OF TECHNOLOGY AND VILNIUS GEDIMINAS TECHNICAL UNIVERSITY REGULATION ON JOINT DOCTORAL STUDIES IN THE FIELD OF INFORMATICS ENGINEERING

I. GENERAL PROVISIONS

1. This This Kaunas University of Technology and Vilnius Gediminas Technical University Regulation on Doctoral Studies in the field of Informatics Engineering (hereinafter – field of science) is prepared in accordance with the Regulations on Doctoral Studies approved by Resolution No. 561 of the Government of the Republic of Lithuania of 12 May 2010 (Valstybės žinios (Official Gazette) No. 59-2900, 2010).

2. This Regulation lays down the procedures on admission to doctoral studies, supervision of doctoral students, preparation and approval of doctoral study and research plan, doctoral studies, the assessment of doctoral student's knowledge, abilities and skills, doctoral research performance, preparation, analysis and defence of a dissertation, issuing of doctorate diploma, performance evaluation of a doctoral student and postponement of deadlines, as well as reviewing requests for external defence of dissertations, examination of appeals and complaints, funding of doctoral studies and document storage, approval of the doctoral committee's resolutions and their implementation procedure; the requirements for the doctoral committee, scientific supervisors, members of the dissertation defence boards; and functions and work procedures for persons, units or purposefully designed structures involved in the process of doctoral studies in the field of science to which Kaunas University of Technology (hereinafter – KTU) together with Vilnius Gediminas Technical University (hereinafter – VGTU) were granted a right by the Ministry of Education and Science of the Republic of Lithuania (hereinafter – the Ministry).

3. The following main concepts are used in this Regulation:

Partner Institutions. Kaunas University of Technology and Vilnius Gediminas Technical University which were granted a right to jointly organize doctoral studies in the field of Informatics Engineering (07T) by the Ministry of Education and Science of the Republic of Lithuania.

Coordinating Institution. Kaunas University of Technology.

Doctoral Student's Institution. An institution where doctoral student performs his doctoral studies, research and prepares a dissertation.

Joint Order. A written agreement signed by the Heads of Partner Institutions or their authorized persons.

Responsible Department. Department of a Partner Institution, organizing doctoral studies activities (Research Affairs Department at KTU, Doctoral Studies Office at VGTU).

4. In agreement with the Research Council of Lithuania, Partner Institutions under a Joint Order forms and approves a doctoral studies committee (hereinafter – the Committee) for a field of study, appoints its Chairman and approves the regulation on doctoral studies and amendments thereto.

Both institutions of joint doctoral studies shall be represented by at least one member with specific number being indicated in the Joint Activity Agreement. Committee is to be composed of at least nine scientists, who have published (will publish until December 31, 2012) at least five scientific works within the last five years: monographs or book chapters published by internationally recognized academic publishers; scientific articles in journals with Impact Factor higher than 0.2 in relation to the Aggregate Impact Factor for the correspondent ISI JCR subject category (if the journal is assigned to several categories, the calculation is made in accordance with the average of the Aggregate Impact Factors for the subject categories); patents granted by the European Patent Office (EPO), the United States Patent and Trademark Office (USPTO) or the Japan Patent Office (JPO), owned by Lithuanian natural or legal persons; other internationally significant works for the subject area. Scientific supervisors and scientific advisors, as well as teachers teaching in doctoral studies shall meet the following requirements: within the last five years they have published at least 3 scientific articles in international scientific journals with Science Citation Index (SCI) and delivered at least 1 report in a prestigious international conference, or at least 1 scientific article in international scientific journal with SCI and 1 monograph, or at least 1 scientific article in international scientific journal with SCI and have carried out research and experimental development works of LTL 200 thousand in total. All participants of doctoral studies process must be of impeccable reputation, having fair scientific recognition outside their environment and having made no other violation of scientific ethics.

5. Doctoral studies and research are coordinated by the Doctoral Studies Committee. The Committee carries out the selection of dissertation topics, submits a list of scientific supervisors to be approved, acts as a mediator in the appointment of scientific advisors, provides conclusions on the research level of the departments and the compliance with qualification requirements of scientists involved in the process of doctoral studies; doctoral studies, research and publication of findings, as well as on doctoral dissertation preparation programmes and their implementation; provides with requirements regarding the language of dissertation, implements doctoral students' performance evaluation, guarantees the success of doctoral studies and implements the upgrade, acts as a mediator in the postponement of deadlines, evaluates the final draft of dissertations, forms dissertation defence boards (hereinafter – the Board). The Committee is to present all the submissions, proposals and decision protocols to the Responsible Departments of Partner Institutions.

6. The purpose of doctoral studies is to train scientists capable of independently performing research and development (social) activities and able to solve scientific problems. A person who has completed doctoral studies and received a doctoral degree is expected to have acquired satisfactory competence: advanced knowledge in research work, scientific fields and their interaction; specialized skills and methods required to solve research-related and other problems, and to keep expanding this knowledge and use it for the enhancement of professional practice; a doctoral graduate is expected to be able to work independently and possess profound understanding of science and his profession in order to generate new ideas or processes and use them in his field of study or any other area. The duration of full-time doctoral studies is 4 years; part-time studies last 6 years. Doctoral studies involve studying, targeted research and preparation of a dissertation.

7. Coordinating Institution:

- 7.1. organize a competition for dissertation topics and scientific supervisors;
- 7.2. organize an open competition for admission to doctoral studies;
- 7.3. presents reports on implementation of doctoral studies to Research Council of Lithuania, Ministry of Education and Science, Centre for Quality Assessment in Higher Education and other institutions;
- 7.4. collects information on doctoral studies process;

- 7.5. in accordance with the documents of the Committee, prepares material for Partner Institutions;
 - 7.6. prepares draft Joint Order;
 - 7.7. administers the production, recording and registration of doctoral diploma blanks;
 - 7.8. writes out and registers doctoral degree diplomas.
8. Doctoral Student's Institution:
- 8.1. administers the transferred State budget funds for implementation of doctoral studies and research, preparation and defence of a doctoral dissertation, payments to scientific supervisors and scientific advisors and other related costs;
 - 8.2. awards scholarships to doctoral students;
 - 8.3. prepares orders related to doctoral studies implementation, and appointment of scientific supervisors and scientific advisors;
 - 8.4. organizes the preparation of doctoral study and research plan (programme), publishing of doctoral dissertations and their abstracts;
 - 8.5. provides favourable conditions for doctoral student to prepare and implement his study and research plan (programme), and to prepare and defend a doctoral dissertation;
 - 8.6. forms and stores doctoral student's personal file;
 - 8.7. organizes the defence of doctoral dissertations;
 - 8.8. prepares and presents reports to Coordinating University on doctoral studies process;
 - 8.9. transfers the necessary documents of doctoral students to the Coordinating Institution.
9. Doctoral studies are financed by the State budget through assignments, State investment programmes and State investment project funds, incomes received as tuition fees, as well as incomes received for economic and research activities and services provided, as well as programme based competitive research funding, funds allocated by the State, international and foreign foundations and organizations, and other legally obtained incomes.
- 9.1. Annual quotas for state funded positions in the science field of Informatics Engineering determined by the Ministry, on a proposal of the Committee and under Joint Order are distributed among Partner Institutions in every academic year (except in cases where quotas are allocated by the Ministry directly to one of Partner Institutions). In accordance with quotas for doctoral studies determined, the Coordinating Institution must transfer the funds for doctoral studies to the accounts of Institutions of Joint Doctoral Studies.
 - 9.2. Funds for doctoral scholarships, payments and social security of members of the Board, doctoral students' supervisors and scientific advisors, doctoral students' research (publication of scientific articles in international journals presentation of doctoral students' scientific works in international conferences subject to availability), dissertation and its abstract duplication, and other costs associated with the doctoral degree granting shall be foreseen in the revenue and expenditure estimates of the Doctoral Student's Institution.
 - 9.3. In cases where doctoral student is admitted to a non-state funded study position, tuition fee is paid to the Doctoral Student's Institution.
10. Doctoral dissertation is defended and doctoral degree is granted by the Board under the Doctoral Student's Institution, composed for the defence of the particular dissertation after the dissertation is finished and recommended for the defence. The Committee compose the Board out of at least five members. The composition of the Board and its Chairman shall be approved by the

Head of Doctoral Student's Institution on a proposal of the Committee. The Board shall organize its work in accordance with this Regulation.

11. A doctoral degree is granted to a person who has accomplished the requirements of doctoral studies laid down in this Regulation, whose dissertation and scientific publications have shown his capability of applying research methods independently and critically, carrying out research, solving scientific problems, and who has successfully defended a doctoral dissertation.

12. The Committee annually evaluates the condition of doctoral studies of the science field (branch), analyses the experience of doctoral studies, the quality of the defended dissertations, and submits the summarized findings and recommendations on doctoral studies improvement to the Partner Institutions.

13. The process of doctoral studies is supervised by the authorized persons of Partner Institutions; the documentation is managed by the Responsible Department of Doctoral Student's Institution.

14. The personal file of a doctoral student (or person wishing to obtain a doctoral degree externally) is stored in the the Responsible Department of Doctoral Student's Institution during the period of doctoral studies and two years after completion, and afterwards placed into the Doctoral Student's Institution Archive. The file shall be composed of the following documents:

14.1. an application for enrolment in doctoral studies, including supplements specified in the announcement of admission to doctoral studies;

14.2. documents related with the enrolment to doctoral studies;

14.3. documents related with the appointment of scientific supervisors and scientific advisors;

14.4. programme (plan) of doctoral study and research, publication of findings and preparation of doctoral dissertation;

14.5. documents related with doctoral student's annual performance evaluation;

14.6. documents related with any postponements of the time limits specified in the doctoral programme (plan);

14.7. records of doctoral examinations taken;

14.8. a list of scientific articles published and accepted for publication and their copies;

14.9. the decision on termination of doctoral studies, in case the doctoral student was expelled from the doctoral studies programme due to the findings presented in evaluation or any other reasons, or due to the failure of presenting doctoral dissertation for the defence before the end of doctoral studies;

14.10. copies of doctoral diploma and diploma supplement;

14.11. an application for the defence of doctoral dissertation and other documents relating thereto (records of initial discussions, final evaluation of a dissertation and etc.);

14.12. a declaration by the doctoral student that the dissertation was written independently;

14.13. an abstract of dissertation;

14.14. a copy of doctoral diploma.

II. ADMISSION TO DOCTORAL STUDIES

15. A doctoral candidate must hold a Master's degree or a higher education degree equivalent to it.

16. State financed doctoral positions for each field of science determined by the Ministry are distributed to the Partner Institutions, on a proposal of the Committee and under Joint Order,

(except in cases where quotas are allocated by the Ministry directly to the Partner Institution) according to the following criteria:

- 16.1. scientific activity results of Partner Institutions;
 - 16.2. the level and amount of research carried out by Partner Institutions scientists participating in the doctoral studies process;
 - 16.3. efficiency and effectiveness of doctoral studies implemented by Partner Institutions;
 - 16.4. research infrastructure available at Partner Institutions;
 - 16.5. weight coefficients of evaluation criteria and other additionally criteria selected, approved by the Joint Order on a proposal of the Committee.
17. Study quotas allocated to the Partner Institution, on a proposal of the Committee and under the order of the Head of Partner Institution) are distributed among the faculties and academic units in accordance with the order of priority of dissertation topics.
18. No later than two weeks prior to an open invitation to a competition for admission to doctoral studies, the Vice-Rector for Research of the Coordinating Institution, acting on a proposal of the Committee, announces a competition for dissertation topics and scientific supervisors. The competition is organized by the Responsible Department of Coordinating Institution and implemented by the Committee. The topics of doctoral dissertation shall correspond to the areas of research of Partner Institutions. The competitive lines of doctoral dissertation topics (scientific supervisors) of each Partner Institution, compiled by the Committee shall be finalized in the protocol of the Committee and signed by the Chairman and the secretary to the meeting. The protocol of the meeting is presented to the Responsible Departments of Partner Institutions. The competitive line of doctoral dissertation topics is published on websites of Partner Institutions by the Responsible Departments.
19. A competition for admission to doctoral studies is announced by the Head of Coordinating Institution, acting on a proposal of the Committee. The announcement shall specify the documents to be presented by the candidates. The admission to doctoral studies may be announced by Partner Institutions individually.
20. A candidate presents an application for admission to doctoral studies, addressed to Head of the Department, to the Responsible Department of Coordinating Institution. Along with the application, indicating the field and form of studies, as well as choices of dissertation topics in order of priority (up to two), a candidate shall present the following documents:
- 20.1. a Master's diploma and diploma supplement (originals and copies (originals to be returned immediately), a document certifying the academic qualification acquired abroad issued by the Centre for Quality Assessment in Higher Education);
 - 20.2. Curriculum Vitae;
 - 20.3. recommendation by two academic referees from the relevant field of science;
 - 20.4. a list of research works and their copies, and in the absence of such works – research project on the topic selected in accordance with the results of competition for doctoral research topics;
 - 20.5. other relevant documents.
21. The competition for admission to doctoral studies is held in July in Partner Institutions. The admission is organized jointly or individually by the Responsible Departments of Partner Institutions and implemented by the Committee. In cases where admission to doctoral studies of each Partner Institution is organized individually, the meeting shall include the committee members and the chairman of the respective institution. An interview with the Committee members must be attended by all candidates.

22. Citizens of foreign states (other than the European Union (EU) Member States) who hold a Master's qualification degree or a higher education degree equivalent to it and are applying to doctoral studies, in addition to the documents listed in paragraph No. 20, are also required to present a document certifying the academic qualification acquired abroad and pay the study fee established by the contracting Partner Institution.
23. Non-EU citizens admitted to doctoral studies have to acquire the residence permit under the procedure established by the laws of the Republic of Lithuania.
24. In accordance with the competition procedures, doctoral candidates are enrolled to full-time or part-time doctoral studies of the science fields (branches), to which Partner Institutions were granted a right. The applicants who fulfil the doctoral studies requirements but have failed to be accepted to the state funded study positions may choose the paid doctoral studies and pay the determined tuition fee. Persons admitted to doctoral studies sign the determined bilateral agreement.
25. After the discussion with a candidate, before admitting to the doctoral studies, the Committee considers the candidate's study evaluations in Master or Integrated Studies, scientific works, scientific activities and experience, and scientists' references. Enrolment criteria, weight coefficients and competitive grade calculation shall be approved annually by the Joint Order on a proposal of the Committee.
26. If the Committee determines that the candidate attended insufficient amount of subjects of the relevant field of science, or that his knowledge in particular subjects is insufficient, the Committee may assign the doctoral student with additional study courses to be attended within the first year of studies.
27. The competitive lines of an open competition and the decision to accept or reject the enrolment to doctoral studies shall be finalized in the protocol of the Committee. The protocol is signed by the Chairman and the secretary to the meeting. Upon request, the protocol may be signed by all members of the Committee. A candidate accepted to the doctoral studies is offered a dissertation topic. The protocol is presented by the Committee to Responsible Department of the Partner Institution.
28. In cases where not all available state funded doctoral studies positions are filled during the regular admittance procedure, an additional competition may be held by the Responsible Department of the Partner Institution under the same procedure.
29. A person is admitted to doctoral studies by the order of the Head of Doctoral Student's Institution, indicating the field of science, topic of dissertation, form of studies, length of studies and the source of funding. The order is prepared by the Doctoral Student's Institution in accordance with the protocol of the Committee and bilateral agreement signed. \
30. The Committee no later than during the first two weeks of the academic year organize a meeting of the Committee in each Partner Institution, involving the Chairman of the Committee, committee members of respective institution, the newly admitted doctoral students and supervisors who won the dissertation topics competition. During the meeting, the newly admitted doctoral students are suggested the dissertation topic, scientific supervisor, and the department of Partner Institution. The proposal of the Committee shall be finalized in the protocol of the meeting. The protocol is signed by the Chairman and the secretary to the meeting. Extracts of this protocol shall be individually presented to each Partner Institutions. The protocol and its extracts are presented to the Responsible Department of Coordinating Institution, which presents the proposal of the Committee (protocol extracts) to the Responsible Department of Partner Institution.
31. Personal file of a person who has failed to be accepted or have not completed the doctoral studies shall be stored at the Doctoral Student's Institution.

III. SUPERVISION OF DOCTORAL STUDENTS

32. The studies and research of doctoral student are supervised by the scientific supervisor (hereinafter – the supervisor). A supervisor has to be a scientist of the corresponding science field (branch). A supervisor may at the same time supervise the study of up to four doctoral students.

33. If necessary, a doctoral student can be assigned scientific advisors (up to two), who can be scientists from another science field (branch). Scientific advisors can be appointed no earlier than after approval of the dissertation topic.

34. The Responsible Department of Doctoral Student's Institution no later than within one month since of the academic year must coordinate the lists of scientific supervisors and departments with the Heads of Doctoral Student's Institutions and present them to be approved by the Senate of Doctoral Student's Institutions. The supervisors shall be approved by the Senate no later than within one month after the admission of doctoral student. Scientific advisors (if considered necessary by the supervisor and the Committee) shall be approved under the same procedure as the supervisor.

35. Scientific supervisor and scientific advisors' written consents and documents, showing the compliance with the qualification requirements of the doctoral studies process, are presented to the Responsible Department of Doctoral Student's Institution.

36. Scientific supervisor:

36.1. together with the doctoral student, prepares a study and research programme (plan) project;

36.2. propose candidates for scientific advisors, if considered necessary;

36.3. provides the doctoral student with methodical assistance, supervises his scientific activities and constantly monitors the doctoral student's success in the doctoral studies process;

36.4. renders assistance to the doctoral student on the issues related with the organization of studies, carrying out research and the preparation of a dissertation;

36.5. for each performance evaluation of the doctoral student presents an opinion on the results of doctoral student's studies and research and the expedience of continuing the doctoral studies;

36.6. along with the doctoral student is responsible for the quality preparation of the doctoral dissertation.

37. Scientific advisor:

37.1. consults a doctoral student on the issues related to some branch of the research field;

37.2. organizes research and experiments in other departments of Doctoral Student's Institution or other institutions.

38. Scientific unit to which the doctoral student is assigned:

38.1. establishes conditions for a doctoral student to successfully implement an individual study and research programme (plan);

38.2. monitors the doctoral student's success in the doctoral studies process;

38.3. encourages doctoral student's mobility;

38.4. helps the doctoral student to gain teaching experience;

38.5. helps to develop excellence in research throughout the entire doctoral studies process;

38.6. for each performance evaluation of the doctoral student presents an opinion on the results of doctoral student's studies and research and the expedience of continuing the doctoral studies;

38.7. upon the preparation of a dissertation, organizes initial deliberations on the doctoral dissertation and appoints the reviewers, presents the Committee with an opinion on doctoral dissertation correspondence to the requirements.

39. In cases where due to significant reasons there is a need to change the supervisor or the advisor, this intention shall be coordinated and approved under the same procedure.

40. A doctoral student has a right to file a reasoned appeal with the Responsible Department of Doctoral Student's Institution requesting to replace his supervisor or advisor. The appeal may be submitted no later than one year before the end of the doctoral studies. The Head of Doctoral Student's Institution or its authorized person directs the appeal to the Committee, which takes the decision within one month. If the doctoral student's appeal is satisfied, the Committee, with regard to the doctoral dissertation topic, announces the competition for the scientific supervisor position. If the appeal is repulsed, the scientific supervisor continues the supervision.

IV. THE PREPARATION DOCTORAL STUDENT'S STUDY AND RESEARCH PLAN AND ITS APPROVAL PROCEDURES

41. A supervisor together with a doctoral student no later than within one month of the supervisor's approval prepare the study and research plan of the doctoral student, including the programmes of doctoral studies and research, and a project. The study and research plan shall include the deadlines of all the works to be carried out. The purposeful research is to be carried out from the beginning of the doctoral studies.

42. The doctoral studies consists of no less than four study subjects with the total volume of no less than 30 ECTS credits. The programme of doctoral studies of the science field (branch) is to be approved by the Vice-Rector for Research of the Coordinating Institution. The programme shall include the main study subjects of the doctoral studies field, study subjects of alternative branches of doctoral field of science, and elective study subjects of doctoral studies and adjacent fields of science. Two study subject chosen by the Committee is obligatory to every doctoral student of the particular field of science of both Partner Institutions. Other courses can be proposed by the supervisor, the department or academic unit, or the Committee. Upon the agreement with the supervisor and the Committee, a doctoral student fills in the selected courses into the individual study plan, which is an integral part of the doctoral student's individual programme of doctoral studies and research. The plan is to be presented within one month from the beginning of the doctoral studies to the Responsible Department of Doctoral Student's Institution to be approved by the Head of Department. A doctoral student is obliged to take examinations in three study subjects within the first year of the doctoral studies. The remaining examinations, of the electively chosen courses, may be taken in any time during the doctoral studies. In accordance with individual study plans, the schedules of study subjects, consultations and examinations are prepared.

43. The doctoral studies programme shall only consist of modules certified by the Committee in accordance with the procedures set by the Partner Institutions. The Responsible Departments of Partner Institutions is responsible that the study modules entered into the individual study plans would be certified and corresponding with the doctoral studies programme.

44. Lectures and consultations in the doctoral studies can be given by the scientists whose research and scientific publications of the last five years correspond to the subjects of study. The modules of the doctoral field of science can be taught by professors. Associate professors can teach modules in doctoral studies only upon the approval of such exception by the faculty board of Partner Institution on a proposal of the Committee.

45. Lectures for doctoral students are organized by the deans of faculties, responsible for the doctoral studies modules, along with the departments and the Responsible Department of Doctoral Student's Institution. Lectures can be organized provided that they are included in the individual

study plans by at least three students. In all other cases the course is studied individually with regular consultations. The schedule of doctoral studies classroom courses is coordinated with the Responsible Department of Doctoral Student's Institution and announced publicly.

46. The research programme of a doctoral student is composed of: the analysis of scientific literature, research, a part of which may be carried out in foreign high-level research centres, the analysis of data obtained, scientific publications, the preparation of a dissertation, and etc.

47. An individual study and research plan of a doctoral student is authorized by the department or academic unit under procedures determined by the Doctoral Student's Institution, approved by the Committee and presented to the Responsible Department of Doctoral Student's Institution.

48. A doctoral student carries out research in accordance with the approved study and research programme. The content, quality, scope and deadlines are evaluated during the doctoral student's performance assessment.

49. A doctoral student is entitled to have access to any necessary research equipment contained in the departments, according to the procedures determined by the Doctoral Student's Institution, laboratories and other academic units. If any research can not be carried out within the Doctoral Student's Institution, it may be carried out other local or foreign science institution.

V. DOCTORAL STUDENT'S KNOWLEDGE, ABILITIES AND SKILLS ASSESSMENT AND PERFORMANCE EVALUATION

50. The study course of each subject ends with an examination. A three-member examination commission is formed for the purpose. The composition of the commission is offered by the department, authorized by the Committee and approved by the authorized person of the Doctoral Student's Institution. The members of the commission may include the module teachers, members of the Committee and other scientists – active specialists in the particular field of science, including scientific supervisors and scientific advisors. Examinations are commended to be organized during the regular exam sessions. Examinations can be conducted both orally and in writing. Examination protocols are presented to the Responsible Department of Doctoral Student's Institution; examination results are entered and stored in the academic information system database.

51. The results of the passed examination are recorded in the examination protocol and signed by all members of the examination commission. The original copies of these protocols are stored in the personal file of a doctoral student in the Doctoral Student's Institution.

52. Upon the submission of the scientific supervisor, the previously taken examinations in the subjects studied within the framework of the doctoral programme may be accepted as passed.

53. After all the doctoral examinations are passed, the Committee issues a protocol stating that the doctoral studies are completed. The Committee specifies the dissertation topic, research programme and the schedule of the preparation of dissertation. The extract from protocol is presented to the Responsible Department of Doctoral Student's Institution.

54. Every year at the end of the fall and spring semesters, the department conducts a performance evaluation of doctoral students. The department or the academic unit with the presence of doctoral student and his supervisor evaluates the implementation of the study and research plan of the doctoral student and provides the conclusions to the Committee which gives the doctoral student a positive (thereby approving the continuation of the doctoral studies and specifying the programme for the next year) or negative (thereby suggesting the termination of the doctoral studies) evaluation. The Committee meeting, organized at the Doctoral Student's Institution, may include doctoral student and his supervisor. A protocol on performance evaluation and documents submitted by the doctoral student is presented to the Responsible Department of Doctoral Student's Institution. The results of performance evaluation are also presented to the head of doctoral

student's academic unit. A doctoral student who received negative evaluation is expelled from the doctoral studies by the order of the Head of Doctoral Student's Institution. An extraordinary performance evaluation of a doctoral student may be conducted on a proposal of scientific supervisor, head of the department or the Committee in cases where doctoral student demonstrably fails to fulfil the requirements of study and research plan.

55. For important reasons (illness, childbirth, parental leave, etc.) the Head of Doctoral Student's Institution can grant a doctoral student an academic leave of absence, extend the period of doctoral studies, research, examinations, preparation of a dissertation and other evaluation. Doctoral students' requests for postponements are registered and the draft orders of the Head of Doctoral Student's Institution are prepared by the Responsible Department of Doctoral Student's Institution.

VI. VACATION, TRIPS, SCHOLARSHIPS, APPELLATIONS, OTHER CIRCUMSTANCES

56. Doctoral students are on vacation in July and August each year.

57. Persons admitted to regular state-financed doctoral studies are paid with a scholarship determined by the Government of the Republic of Lithuania. As a result of assessment delays or violation of the internal order a doctoral student may lose under the Head of Doctoral Student's Institution order a one month scholarship in that year. If it is established during annual assessment that doctoral student did not implement his annual individual plan and his assessment is delayed, he does not receive scholarship for the period from delay until next assessment. When studies are temporally interrupted and student rejoins study, calendar days of incomplete month are included into the doctoral studies duration term and a student receives adequate part of scholarship, except if a student rejoins his study on the first or the last day of month.

58. Given the important reasons, after coordination with the doctoral student's scientific supervisor, the Head of the core academic unit, the Committee and the responsible department of Doctoral Student's Institution, doctoral student might be permitted under the order of Head of Doctoral Student's Institution to interrupt studies temporally, but not more often than once a year and for the period up to one year in total.

59. In case of illness, doctoral student himself or his close people must inform the Research Affairs Department about this fact no later than in three days. Student must deliver a medical report for the period of illness after he rejoins his work. On the basis of this report student is permitted to delay the terms of assessment under the Rector's order. The illness does not influence the duration of doctoral studies. In case the illness lingers, student may apply for permission to temporally interrupt studies or to take an academic leave of absence.

60. Doctoral student may perform research or take a period of study in other institutions or abroad. This period is included into the total study period and student receives his scholarship. Student takes such trips under the Trip Regulation established by the Government, under the order of Head of Doctoral Student's Institution based on student's application endorsed by the scientific supervisor, head of the core academic unit, dean and responsible department of Doctoral Student's Institution. Study trips may be financed from projects and programmes administrated by Research Council of Lithuania, funds of academic unit of Doctoral Student's Institution, from international relations fund for students of Doctoral Student's Institution, may be reimbursed by the host party, or financed from other resources. Pay for trip expenses or a part of it may be disbursed before departure. After student returns from the trip, he must submit the documents that vouch the expenses to the Accounting Department of the Doctoral Student's Institution in three working days.

61. Doctoral student may have each year an academic load, established by Doctoral Student's Institution (not exceeding 0.5 of full-time equivalent), if it corresponds to the needs and possibilities

of the doctoral student's department or research unit. Doctoral student receives salary if his workload exceeds 0.25 of the full-time equivalent.

62. Doctoral students receive certification about completion of doctoral studies after they pass assessments of all study modules and submits affirmatively evaluated doctoral thesis according to the order established in paragraphs No. 67 and No. 72 of this Regulation. For those who have not fulfilled the requirements of individual study and research programme and (or) have not submitted the doctoral thesis, the certificate with indicated period of doctoral studies and partial results is issued.

63. Expenses for the publication and sending of doctoral thesis and abstracts, firstly rendered by doctoral students, are covered from the Science Foundation of Doctoral Student's Institution.

64. Motivated appeal concerning not granted doctoral degree, complain concerning the rejection of request to defend doctoral theses by extern or doctoral student, or other paragraphs concerning doctoral studies must be submitted to Secretariat of Doctoral Student's Institution addressed to the Head of Doctoral Student's Institution. The head of Doctoral Student's Institution submits the appeal to the committee, respective departments of Doctoral Student's Institution or purposefully formed structures for approval. Appeal must be processed and the decision must be made within 2 months after receiving. Respective department of Doctoral Student's Institution writes the response concerning the decision addressed to the Rector and dispatches it to the declarant in 3 working days after the decision has been made.

VII. PREPARATION AND EXAMINATION OF DOCTORAL DISSERTATION, ISSUANCE OF DIPLOMA FOR DOCTOR OF SCIENCE

65. Doctoral dissertation must be original research work. Doctoral dissertation is prepared following the paragraphs No. 20 and No. 21 and the abstract is prepared following the paragraph No. 22.

Doctoral dissertation must be original research work, summarizing all research performed by doctoral student, examining the problem of science field. The volume of 4-10 printer sheets is recommended. In the dissertation the aim, objectives and tasks of research must be defined, novelty of research work must be indicated, the worldwide survey of research on this topics must be performed, applied research methods must be presented, research outcomes must be discussed, and their reliability and relation to the data gained by other researchers must be substantiated. The conclusions may be submitted in a separate section. Dissertation must contain lists of used scientific literature, sources, and doctoral student's scientific publications related to the dissertation topics. If dissertation is written in Lithuanian, abstract must be written in foreign language with a comprehensive summary in Lithuanian. If thesis is written in foreign language, abstract must be written in Lithuanian with a comprehensive summary in foreign language. Abstract must include definition of the issue under research, goals and tasks of the research work, description of scientific novelty of the work, research methodology, main outcomes and resultant conclusions defended by doctoral student, list of student's publication on the subject of thesis and short information about the doctoral student. Abstract must amount about one printer's sheet (equals 40 000 characters). Dissertation and abstract must be written in correct language.

66. Doctoral scientific supervisor and scientific advisors must be indicated in dissertation and its abstract, and abstract must also state the composition of the Dissertation Defence Board. In the case where doctoral scientific supervisor was replaced, the previous doctoral scientific supervisor and time period of his supervision must be indicated in dissertation and abstract. The title page and the second page of a dissertation (or abstract of monograph) are laid out in the annex No. 1.

67. Doctoral student presents his thesis during the meeting the academic unit of Doctoral Student's Institution, with scientific supervisor and advisors participating in it. The dissertation, its

draft abstract and student's scientific publications, his capabilities and achieved scientific qualification are estimated according to the order established in the Doctoral Student's Institution and then the conclusion is submitted to the Committee. It is requested that doctoral student would have been presented the outcomes of his research work on the dissertation subject in no less than two international conferences, and that he would have been published his key research outcomes in no less than two scientific journals, published in reviewed scientific journals, included in international publications databases.

68. Doctoral student submits a request addressed to the Head of Doctoral Student's Institution for dissertation defence and renders it to the responsible department of Doctoral Student's Institution along with the following documents:

68.1. A copy of the Master's diploma or of a higher education diploma equivalent to it;

68.2. Curriculum Vitae;

68.3. Certified copies of protocols on examines passed according to the doctoral study programme (they are arranged by the responsible department of Doctoral Student's Institution according to the documents in student's file and the records in databases);

68.4. Author's guarantee for the originality of the dissertation (Annex No. 2);

68.5. Commitment to publish the dissertation in the Lithuanian Electronic Theses and Dissertations Database (ETD) within two weeks after the public defence of the dissertation;

68.6. List of scientific works related to the dissertation topics and their copies (if the material is not published yet, it is necessary to include the certification from the editorial office confirming that the publication is pending);

68.7. Printed doctoral dissertation (2 copies) and its draft abstract (2 copies);

68.8. Reviews by scientific supervisor and scientific advisors (if any). If the reviews have been submitted to the responsible department of Doctoral Student's Institution, there is no need to submit any copies; the responsible department of Doctoral Student's Institution will make necessary copies;

68.9. Extract from the dissertation evaluation protocol of Department or other unit, where the dissertation has been prepared. This protocol must include a conclusion of a particular content, indicated in the paragraph No. 67 (if the extract from the protocol has been submitted to the responsible department of Doctoral Student's Institution during doctoral studies, there is no need to submit any copy; the responsible department of Doctoral Student's Institution will provide it). In case if the dissertation is submitted by doctoral student from other institution than Partner Institutions, the student must submit the extract of the dissertation evaluation protocol from institution concerned with a submitting for defence, signed by the head of respective institution.

69. Responsible department of Doctoral Student's Institution examines if the documents provided complies with the formal requirements and then submits for the Head of Doctoral Student's Institution the request along with all annexes.

70. The Head of Doctoral Student's Institution forwards the request along with the documents listed in the paragraph No. 68 to the Committee of Science Field; responsible department provides those documents to the Committee.

71. The Committee Chairman convokes the meeting of the Committee no later than within two weeks after the documents have been received. During this meeting two opponents from the Committee members (thereinafter: Opponents) must be appointed and, if the Committee decides so, one opponent from outside the Committee (a scientist from the Doctoral Student's Institution or other Lithuanian or foreign institution).

72. No later than in one month after the documents concerning the defense have been received, the Chairman of the Committee convokes open meeting in each Partner Institution with Committee members, representing respective Partner Institution, doctoral student (defendant) and his scientific supervisor participating in it. The Committee members hear the defendant's discourse about his dissertation work (no less than 20 minutes), with goals, tasks, novelty, relevance, originality of the work along with the outcomes, statements and solutions revealed in it; opponents' reviews (they must be submitted to the responsible department of Doctoral Student's Institution in written) and the defendant's answers to the remarks and comments laid out in the reviews; and the dissertation review provided by the scientific supervisor.

73. The Committee evaluates with an unprejudiced reasoning the aims and goals of dissertation, scientific novelty and relevance of the work; survey of research on this topics in Lithuania and worldwide and described researched methodology; reliability and validity of outcomes obtained; validity of statements of defended conclusions and conformity to research substance; conformity of draft abstract to the content of dissertation; conformity of scientific publications and published research outcomes to the fundamental statements of dissertation.

74. The Committee may conclude that:

74.1. Dissertation or its abstract must be corrected. Dissertation is returned to the doctoral student. Corrected dissertation is discussed starting from requirements listed in the paragraph No. 71 and/or the subsequent paragraphs;

74.2. Dissertation is prepared correctly, it complies with the paragraphs No. 19-21 of Regulations on Doctoral Studies approved by the Government of the Republic of Lithuania, doctoral student has pursued the requirements listed in the paragraph No. 24 of Regulations on Doctoral Studies, and the dissertation may be submitted for defence without any changes need to be made;

74.3. Dissertation does not meet the requirements.

75. If the Committee decides that dissertation may be presented for defence, the Committee:

75.1. Establishes the language of the public meeting on the dissertation defence in the Board;

75.2. Substantiates the decision to defend dissertation in closed meeting in the exceptional cases;

75.3. Prepares project of the constitution of Dissertation Defence Board of no less than three members;

75.4. With the aid of responsible department of Doctoral Student's Institution collects the agreements of intended members of the Board and the documents that prove their conformity to the qualification requirements for the members of doctoral study process (lists, certifications etc);

75.5. Draws the list of Lithuanian and foreign research and study institutions to which the dissertation abstract (paper) must be sent, considering the topics of dissertation;

75.6. Suggests the date and place for dissertation defence;

75.7. Delegates the member of the Committee to participate in the Board's meeting as an observer and refers to the Committee about the process of defence in the Board;

75.8. Prepares presentation to the Head of the Doctoral Student's Institution and renders it to the responsible department of Doctoral Student's Institution.

76. Dissertation is defended in open meeting of the Board (except for cases listed in the paragraph No. 81.) following the Regulation on the Defence Board of Doctoral Dissertation of Science Field (annex 3). The meeting is in Lithuanian. In case other language than Lithuanian is used during the meeting, translations to the Lithuanian has to be performed. Chairman of the Defence Board conducts the meeting. The meeting is legitimate if more than half of all members of Defence Board participate in it (including those who participate in a teleconference). If the Board comprises three

members, meeting is legitimate if all those three members participate in it. Meeting is grounded with principles of equity, transparency, tolerance, correctness and legitimacy as well as with members' personal responsibility for their activity and decisions. Reviews about dissertation, received from the members who do not participate in the meeting and other reviews must be read during the meeting.

77. The defendant presents main outcomes and findings of his work, indicates his input into the publications presented in the dissertation. Members of Defence Board evaluates reasonably the scientific level of dissertation, novelty and originality of outcomes, reliability and validity of conclusions, notes weaknesses and inaccuracies of the work and during the defence also evaluates defendant's scientific competence. The defendant responds to questions and commentates provided notes and remarks. During the discussion the defendant must defend the outcomes of his work and reveal his research competence.

78. After the discussions with the defendant, members of the Defence Board decide by voting on the granting of scientific degree of Doctor to the student. Members who participate in teleconference vote as well. Decision to grant a degree is made if more than half of all members of the Defence Board votes for it. The voting protocol must be signed by all members of the Defence Board who have directly participated in the meeting.

79. Members of the Board must be scientists of particular science field having no joint publications with doctoral student. Conflict of interests must not be possible among the members of the Board and the defendant or his scientific supervisor (or scientific advisor, if dissertation is defended externally). At least two members of the Board must be scientists from other institutions (one of them must represent foreign science and study institution). Doctoral student's scientific supervisor and scientific advisor may not be a member of the Board. Two members of the Board represent other science fields, if the work comprises two science fields or if it is necessary for comprehensive evaluation of the work.

80. Member of the Board must comprehensively analyze the dissertation and indicate positive and negative points of it. Novelty, relevance and originality must be evaluated, the opinion about the conformity of work to the requirements for doctoral dissertation must be declared. Member of the Board must provide dissertation review in written to the responsible department no later than in five working days before the defence. The defendant has a right to familiarize with submitted reviews.

81. In the case where dissertation includes information considered to constitute a State, trade or commercial secret, dissertation may be defended in closed meeting.

82. Responsible department of Doctoral Student's Institution examines documents and prepares project of the order of the Head of Doctoral Student's Institution, confirming the Board, date and place of defence.

83. After the Head of Doctoral Student's Institution signs the order:

83.1. Doctoral student finishes his dissertation abstract;

83.2. Responsible department of Doctoral Student's Institution organizes publishing of the abstract in required edition;

83.3. Responsible department of Doctoral Student's Institution no later than within one month before the defence sends copies of dissertation and abstract to members of the Board, to libraries of Partner Institutions and to addressees listed in the paragraph No. 75.5, one copy for each;

83.4. Responsible department of Doctoral Student's Institution announces the dissertation defence in the intended sections of websites of the University and the Research Council of Lithuania. Announcement about the dissertation defence may also be published in press. Name and surname of defendant, institution, in which dissertation has been prepared, address of website where dissertation is published, title of dissertation, time and place of defence, name and surname of

scientific supervisor and members of the Board along with their fields of science and institutions must be published in the announcement;

83.5. Responsible department of Doctoral Student's Institution exhibits dissertation in the Library and website of Doctoral Student's Institution.

84. Responsible department of Doctoral Student's Institution keeps and arranges all documents of the Board. All documents of defence are presented to the responsible department of Doctoral Student's Institution after the defence, including meeting protocol and decision of the Board on granting of doctor degree to defendant. On the ground of this decision responsible department of Coordinating Institution writes out the doctoral diploma.

85. The Head of Doctoral Student's Institution appoints by his order the employee of responsible department who must observe the Board's work and together with the Chairman of the Board strives to prevent the violation of the Regulations on Doctoral Studies approved by the Government of the Republic of Lithuania and this Regulation. If some violation occurs, and the degree is decided to be granted despite of those violations, the employee informs the Head of Doctoral Student's Institution about it.

86. The doctoral degree is awarded to the person who has defended doctoral dissertation by both Partner Institutions. Coordinating Institution writes out the doctoral diploma after the decision on doctoral degree granting is received. Responsible department of Coordinating Institution under the cooperation with the responsible department of Partner's Institution submits the diploma for signing to the Heads of both Partner Institutions (Head of Doctoral Student's Institution signs first).

87. Registered doctoral diploma is awarded to the scientist during the meeting of Senate of Doctoral Student's Institution after the dissertation is published in the Lithuanian electronic theses and dissertations database (ETD).

88. If the Board decides that doctoral degree cannot be granted, the defendant is entitled to defend the amended and supplemented dissertation not earlier than after a period of one year. In this case, the dissertation is defended externally following the requirements listed in article VIII of this Regulation. In that case if a fact of scientific dishonesty (plagiarism, etc.) is established, dissertation cannot be defended.

89. Appeal on not granted doctoral degree is processed following the procedures listed in the paragraph No. 64 of this Regulation.

90. Partner Institutions may revoke the decision on doctoral degree granting, if the fact of scientific dishonesty is established or doctoral degree has been awarded under violation of this Regulation.

91. Partner Institutions informs the Research Council of Lithuania and the Ministry of Education and Science of the Republic of Lithuania about the outcome of defence within 10 working days after meeting of the Dissertation Defence Board. Within two weeks after defence of the dissertation doctoral student presents a copy of the defended dissertation to Martynas Mažvydas National Library of Lithuania and publishes in the Lithuanian electronic theses and dissertations database (ETD).

92. Personal file of a person who has defended the doctoral dissertation Doctoral Student's Institution is kept in respective department of the Institution within two years and is delivered to the Institution's archive after. The file must include:

92.1. Request for defence of dissertation along with included documents and presentation for defence provided by the Committee;

92.2. Written consent to publish dissertation in the Lithuanian electronic theses and dissertations database (ETD) within two weeks after the meeting of dissertation defence;

- 92.3. Documents related with the constitution of the Board;
 - 92.4. List of addressees the abstract has been sent to;
 - 92.5. Document on rendering and sending of dissertation to Martynas Mažvydas National Library of Lithuania and libraries of Partner Institutions;
 - 92.6. Protocol of dissertation defence meeting;
 - 92.7. Board's decision about doctoral degree granting;
 - 92.8. Copy of doctoral diploma.
93. If a person has passed doctoral studies and has acquired a degree at the University, documents listed in the paragraphs No. 14 and 92 of this Regulation may be kept in one place.

VIII. OBTAINING A DOCTORAL DEGREE EXTERNALLY

94. A person may acquire doctoral degree externally if he meets the requirements listed in the paragraph No. 36 of Regulations on Doctoral Studies.
95. Request on behalf the Head of Partner Institution on defence externally along with documents listed in paragraph No.37 of Regulations on Doctoral Studies approved by the Government of the Republic of Lithuania must be submitted to the responsible department of Doctoral Student's Institution. If the responsible department establishes conformity of the submitted documents to the requirements listed in the paragraph No. 36 and No. 37 of Regulations on Doctoral Studies, it submits the request along with all annexes to the Head of Doctoral Student's Institution.
96. Head of Partner Institution forwards the request along with annexes to the Committee; it appoints no less than two experts with respective department or other unit of the Doctoral Student's Institution to evaluate the level at which dissertation is prepared. Scientists from the Doctoral Student's Institution or other research institutions may work as experts in this case. Department or other unit of the Doctoral Student's Institution organizes meeting and estimates whether the material provided meets the requirements listed in the paragraph No. 19-21 and No. 37 of Regulations on Doctoral Studies approved by the Government of the Republic of Lithuania.
97. After the conclusions are received, the Committee no less than in three months after the request has been submitted convokes the meeting, with external student participating in it. After hearing of experts and external student, the Committee decides, following the requirements listed in the paragraph No. 73 of Regulations on Doctoral Studies approved by the Government of the Republic of Lithuania, whether the material provided meets the requirements for doctoral dissertation.
98. In that case if the Committee decides that presented or corrected dissertation might be recommended for defence, the Committee:
- 98.1. Appoints the external student to the respective academic unit of the Partner Institution;
 - 98.2. Submits the scientific advisor for confirmation in the Senate of Doctoral Student's Institution; this scientific advisor will be provided with functions of external student's scientific supervisor. If a person who has already studied in doctoral studies, but has not submitted the dissertation, strives to obtain doctoral degree externally, the Committee might appoint his former scientific supervisor or other person as a scientific advisor;
 - 98.3. Makes decision about the acknowledgment of exams passed during doctoral studies and sets the exams of doctoral studies that need to be passed and the deadline to pass them, establishes constitution of examiners and examination procedure;

98.4. Settles the deadline for preparation of dissertation and abstract for defence, which cannot be further than one year after the decision has been made.

99. External exams are organized following the requirements listed in the Section V of this Regulation, and dissertation is examined following the requirements listed in section VII.

100. If the Committee decides that dissertation may not be prepared in one year, external student may submit the appeal, which is processed following the paragraph No. 64 of this Regulation. In case the resolution is negative, external student may submit his request repeatedly but not before the expiry of a period of one year.

IX. PROCEDURE OF DOCTORAL STUDIES COMMITTEE

101. Activity of the Committee is based on the collegial counsel, principles of equity, transparency, tolerance and legitimacy, as well as on personal responsibility of Committee members for their activity.

102. Meeting secretary, elected from Committee members, arranges meeting documents and signs protocols.

103. Committee's decisions are legitimate if half of its members, representing each Partner Institution (including those who participate in teleconference) participate in the meeting. Those Committee members, who are not able to participate in the meeting, may express their opinion under the questions discussed in advance in written or by e-mail, although they cannot vote. Those messages must be written during the meeting. Committee makes final decision by voting: if votes are distributed equally, the Chairman's vote is deciding. Committee meeting protocol are written in two copies, one of which is kept in the responsible department of Coordinating Institution within 6 years and later in archive of Coordinating and another one is kept by the Committee. Responsible Department of the Coordinating Institution sends the extracts of meeting protocol for the Partner Institutions.

104. Committee Chairman convokes and organizes work, and in case he is absent, he appoints Committee member to temporally deputize him. His obligations are following:

104.1. To examine documents in advance;

104.2. To analyze documents received, which must be presented during Committee meeting, or to assign it to Committee member;

104.3. To chair during the Committee meeting;

104.4. To sign documents of Committee meeting.

105. Committee member:

105.1. Familiarizes with documents received in advance;

105.2. Expresses his opinion under the question concerned;

105.3. Implements other Chairman's assignments.

106. Committee meeting is public.

107. After the meeting is over, Committee Chairman returns all documents to the responsible department of each Partner Institution.

AUTHORSHIP DECLARATION

I, _____, hereby confirm that this doctoral dissertation _____ entitled:

_____ is prepared in accordance with the requirements laid down in Kaunas University of Technology Regulation on Doctoral Studies in the Field of Informatics Engineering. Where I have quoted from the work of others, either directly or indirectly, the source is always referenced. My own contribution in the dissertation topic-related publications published together with the co-authors is sufficient.

In selecting and evaluating the material, as well as preparing the manuscript, apart from my scientific supervisor, I was advised by:

No contribution of other persons to the dissertation prepared is present. I have not made any other payments than those foreseen in the laws with regard to this work.

This work has not been presented for the defence of doctoral dissertation neither in this or in any other form in the State and abroad.

Annex 3

Regulation on the Defence Board of the Science Field for the Defence of Doctoral Dissertation

1. This Regulation lays down the work procedures for the Defence Board of the Science Field for the Defence of Doctoral Dissertation, constituted under the Regulations on Doctoral Studies, approved by Resolution No. 561 Government of the Republic of Lithuania of 12 May 2010 (Valstybės žinios (Official Gazette) No. 59-2900, 2010).
2. Research Affairs Department arranges Board's documents and organizes the meeting for the dissertation defence.
3. Work procedures of the Board are organized by Chairman of the Board. The Chairman:
 - 3.1. Analyzes in advance the personal file of the defendant and makes sure that the file and all meeting documents (ballot papers, blank of voting protocol and others) are prepared correctly;
 - 3.2. Examines the reports received, which must be submitted during the meeting of the Board, or assigns this work for a member of the Board;
 - 3.3. Ascertains that everything is prepared for the meeting correctly (to perform meeting phonogram or stenography, visual demonstration and translation, if needed);
 - 3.4. Chairs during the meeting of the Board;
 - 3.5. Signs the documents of the meeting.
4. Member of the Board:
 - 4.1. Examines the dissertation in advance and evaluates whether it is a novel research work, which includes doctoral student's research work on the topics of science field, and whether its content meets other requirements for doctoral dissertation;
 - 4.2. Estimates whether the defendant's publications are published in scientific journals and whether the key research outcomes are published in those publications.
5. The meeting is public (in case of the closed meeting, participants only include members of the Board, the defendant, his supervisor and scientific advisors, employee from the Research Affairs Department, delegated to observe the meeting, and the representative of the Committee; all members of the meeting sign the declaration of data confidentiality). The proceeding of the meeting is as follows:
 - 5.1. The Chairman of the Board after he makes sure that more than half of members of the Board, including those who participate in teleconference, participate in the meeting (if the Board has three members, the meeting is legitimate when all three members participate in it), and those members who do not participate in the meeting have submitted their report in written, informs the participants of the meeting and the quorum about it and presents the file of the defendant;
 - 5.2. The defendant introduces his dissertation topics, aims, goals, research data, main research outcomes and findings, and answers the questions;
 - 5.3. Doctoral student's supervisor and scientific advisors are entitled to give their voice;
 - 5.4. The Chairman of the Board initiates scientific discussion lead off by the members of the Board. They must evaluate reasonably the scientific level of the dissertation and the validity of outcomes, estimate whether the dissertation, abstract and publications meet the requirements of the Regulations on Doctoral Studies. Members of the Board must pose questions to the defendant;

- 5.5. The Chairman or his appointed member of the Board reads in public the reviews on the dissertation or, upon the agreement of the members of the Board, introduces the notes and conclusions presented in the reviews, and the defendant may deliver his remarks;
- 5.6. Members of the Board and guests are entitled to speak (in case of an open meeting); the defendant may ask for an opportunity to speak after any speech, which he is given;
- 5.7. The defendant makes his final speech when the discussion comes to an end;
- 5.8. When the members of the Board stays in the voting room:
 - 5.8.1. The Chairman of the Board distributes the ballot papers;
 - 5.8.2. The Chairman of the Board fills the voting protocol after the voting; members of the Board have a right to verify the voting results;
 - 5.8.3. The members of the Board confirm by open vote the voting results and sign the voting protocol and Board's decision on the granting of doctoral degree.
- 5.9. The Chairman of the Board reads the decision to the members of the meeting and announces the end of the voting.
6. After the end of the meeting the Chairman of the Board returns to the Research Affairs Department the documents of the dissertation defence.
7. The Chairman of the Board reviews and signs the protocol of the meeting, arranged following the stenograph or phonogram.
