I think that BAFF Professional Internship Program is a fantastic opportunity for young people to perceive a different culture, gain international experience in their field, and use that experience later on in their home countries. I worked with one of the fastest-growing construction companies in the U.S. – “DPR Construction” in California Newport Beach. This amazing experience allowed me not only to get to know new technologies but also to meet endless wonderful and interesting people with whom I think the connection will remain for a long time to come.
