

APPROVED BY
Decision No. V3-S-38 of the Senate of
Kaunas University of Technology of
30 November 2020

REGULATION ON RESEARCH DOCTORAL STUDIES OF THE INSTITUTIONS OF JOINT DOCTORAL STUDIES

CHAPTER I GENERAL PROVISIONS

1. This Regulation on Research Doctoral Studies of the Institutions of Joint Doctoral Studies (hereinafter – Regulation) has been prepared following the Regulations on Research Doctoral Studies (hereinafter – Regulations), approved by Order No. V-739 of the Minister of Education, Science and Sport of the Republic of Lithuania of 18 May 2020 and the joint activity agreement between the institutions of joint doctoral studies (hereinafter jointly referred to as *Institutions*, and individually as *Institution*). This Regulation is applicable to doctoral studies in the science fields in which Kaunas University of Technology is the coordinating institution, and a joint right to doctoral studies has been granted with other Lithuanian research and educational institutions.

2. The following definitions are used in the Regulation:

2.1. **Institutions of joint doctoral studies** – research and/or educational institutions holding a joint right to doctoral studies;

2.2. **Coordinating Institution** – Kaunas University of Technology;

2.3. **Doctoral student's institution** – the institution in which a doctoral student completes his/her doctoral studies, conducts research and prepares a dissertation;

2.4. **Research doctoral student (hereinafter referred to as doctoral student)** – a student researcher of the third study cycle;

2.5. **Doctoral School** – the unit of the institution of joint doctoral studies which organises the activities of doctoral studies.

3. The Regulation lays down the procedures for admission to joint research doctoral studies (hereinafter referred to as Doctoral Studies), the procedure for the organisation of the competition for the thematic area of a dissertation and the selection of supervisors of doctoral students, the supervision of doctoral students, the preparation and approval of a doctoral student's work plan, the assessment of Doctoral Studies, the doctoral student's knowledge, abilities and skills, the implementation of the doctoral student's research, the preparation, examination and defence of a dissertation, the issuing of the doctoral diploma, the postponement of a doctoral student's attestation and assessment deadlines, the review of an external student's application for dissertation defence, the examination of appeals and complaints, the funding of Doctoral Studies and document storage, the procedure for approval and implementation of the doctoral committee's resolutions; the requirements for the members of the doctoral committee and defence boards, the supervisors of doctoral students, as well as the functions and work procedures of the individuals, departments or specifically assembled structures involved in the process of Doctoral Studies.

4. The Senate of the Coordinating Institution in agreement with the involved Institutions and the Research Council of Lithuania assembles and approves a doctoral committee of the science field (hereinafter – Committee). Head of the Coordinating Institution appoints the chairperson of the Committee from the proposed members of the Committee.

The Committee consists of at least 9 scientists conducting high-level research under the joint activity agreement signed between the Institutions. The members of the Committee can be scientists working (i.e., those scientists who have taken a job position under the procedure of competition or have been working at least 0.5 FTE at the Institution for the last three years) at the Institution holding the right to Doctoral Studies and foreign scientists participating on contract in the activity of joint

doctoral studies with foreign research and educational institutions. At least two-thirds of the members of the Committee have to represent the science field in which the right to Doctoral Studies has been obtained. A member of the Committee can be the chairperson of the Committee for two consecutive 4-year terms of office at most. A scientist cannot be a member of more than two doctoral committees. At least half of the members and the chairperson of the doctoral committee have to meet at least the minimum qualification requirements for the individuals who aim to take the position of a chief researcher stipulated by the Description of Minimum Qualification Requirements for the Job Positions of Researchers of Research and Education Institutions, approved by the decision of the chairperson of the Research Council of Lithuania No. V-340 *On Approval of the Description of Minimum Qualification Requirements for the Job Positions of Researchers of Research and Education Institutions* of 28 June 2018 (hereinafter referred to as Minimum Qualification Requirements). The remaining members of the Committee have to meet at least the established minimum qualification requirements for the individuals aiming to take the position of a senior researcher.

The members of the defence board can be those scientists who have published at least five scientific works during the last five years: monographs or book chapters published by internationally recognised publishers; scientific papers in journals with impact factor in the *Clarivate Analytics Web of Science* (abbreviated as *CA WoS*) (in the areas of humanities, social, physical sciences and technologies) and/or *Scopus* (in the areas of humanities and social sciences) databases.

The supervisors and consultants of doctoral students have to comply with the following requirements: within the last five years, they are required to have published at least 3 scientific papers in international scientific journals with impact factor in *CA WoS* (in the areas of humanities, social, physical sciences and technologies) and/or *Scopus* (in the areas of humanities and social sciences) databases or at least 1 scientific paper in an international scientific publication with impact factor in *CA WoS* (in the areas of humanities, social, physical sciences and technologies) and/or *Scopus* (in the areas of humanities and social sciences) databases, and a scientific monograph.

All the participants of the process of Doctoral Studies have to adhere to the principles and standards of ethical behaviour set out by the Institutions.

The Doctoral School of the doctoral student's Institution coordinates and organises the process of Doctoral Studies following the Law on Science and Studies, the Statute and Regulations of the doctoral student's Institution, and this Regulation.

5. The Doctoral Studies and research are coordinated by the Committee. The Committee conducts the selection of the dissertation thematic area, selects candidates for research supervisors of doctoral students, assigns the doctoral student's academic department and consultants, approves the doctoral students' work plans, provides conclusions on the research level of the academic departments involved in the process of Doctoral Studies, the Doctoral Studies, the research and publication of the findings, as well as conclusions on the programmes of the preparation of a doctoral dissertation and their implementation, the language of the dissertation; conducts the performance evaluation of doctoral students, takes care of the success of Doctoral Studies and implements upgrade of their level; acts as a mediator in the postponement of deadlines of a doctoral student's work plan; evaluates the prepared doctoral dissertations; assembles the defence boards (hereinafter – the Board). The Doctoral School of the Coordinating Institution annually verifies the compliance of the Committee members with the requirements stipulated by the Regulation. The Committee formalises all of its submissions, proposals and decisions/verdicts in protocols signed by the chairperson and the secretary of the Committee. After a meeting of the Committee, the protocol is submitted to the Doctoral School which prepares the material for the heads, the Vice-Rectors and the Senate (the Research Council) of the Institution based on the decisions/verdicts made by the Committee.

6. The objective of Doctoral Studies is the preparation of scientists capable of independent performance of research and experimental development work, solving scientific problems, as well as work in academic and non-academic environments. The duration of Doctoral Studies is 4 years (full-time studies) or 6 years (part-time studies). Doctoral Studies include studies, targeted research, preparation and defence of a dissertation.

7. Doctoral Studies are financed by the state budget through assignments, state investment programmes and state investment project funds, the income received as tuition fees, the income received for economic and research activities and provided services, programme-based competitive research funding, funds allocated by the state, international and foreign foundations and organisations, and other legally obtained income.

8. The funds of Doctoral Studies are allocated for the scholarships of doctoral students (support for studies); the remuneration of pedagogical work of the supervisors, consultants of doctoral students and the lecturers providing the study modules of Doctoral Studies; the implementation of the process of the doctoral dissertation defence (the remuneration of the members of the Board, the publishing of a dissertation and the financing of other costs); the formation of the funds for financing of the acquisition of the products and services compliant with the research needs of doctoral students (including open access services), the assurance of the quality of scientific publications, preparation of dissertations and short-term international mobility; the implementation of the initiatives of the Committees for the improvement of Doctoral Studies; the promotion of doctoral students; the covering of costs of the Doctoral School and the proportional share of funds of the University's infrastructure costs.

9. A doctoral dissertation is defended and a doctoral degree is awarded by the Board assembled for the defence of the particular dissertation after the dissertation has been completed and recommended for defence by the Committee. The Committee assembles the Board of at least three members while appointing one of the members as the chairperson. The composition of the Board and its chairperson is approved by the Rector of the Institution at which the dissertation shall be defended, at the proposal of the Committee.

10. The doctoral degree is awarded to the individual who has fulfilled the requirements of Doctoral Studies laid down in this Regulation, whose dissertation and scientific publications have demonstrated his/her capability of independent and critical application of research methods, conducting research, solving scientific problems, and who has successfully defended his/her doctoral dissertation; or to the individual who has defended a prepared dissertation externally.

11. The Committee annually evaluates the level of the research carried out in the thematic area of the dissertation at the Institutions, the condition of Doctoral Studies, analyses the experience of Doctoral Studies, the quality of the defended dissertations, and submits the summarised conclusions and recommendations for the improvement of Doctoral Studies to the Doctoral School.

12. The process of Doctoral Studies at the Institutions is supervised by the responsible employees appointed by the heads of the Institutions; the documentation is managed by the Doctoral School.

13. Joint/double-degree doctoral programmes can be provided with foreign research and educational institutions for the enhancement of internationality and quality of Doctoral Studies. In such a case, contracts on joint/double-degree Doctoral Studies are drawn with foreign research and educational institutions; agreements are made regarding the conditions and obligations related to the studies of doctoral students.

CHAPTER II ADMISSION TO DOCTORAL STUDIES

14. Students are admitted to Doctoral Studies under the procedure of the open competition stipulated by the Regulation. The individuals who have obtained a Master's qualification degree or an equivalent higher education degree can participate in the open competition for admission to Doctoral Studies. Additional requirements for the applicants with regard to the suggestions of the Committees are stipulated by the Rules for Admission to Doctoral Studies annually approved by the Senate of the Coordinating Institution.

15. The expenses of the Coordinating Institution which are stipulated by the joint activity agreement and incurred during the process of admission to Doctoral Studies are covered by the Institutions according to the number of the admitted doctoral students.

16. Those doctoral students who terminate their studies on their own will or are excluded from Doctoral Studies by the Committee's decision cannot apply to the state-funded places of Doctoral Studies for the second time if they have studied more than half of their Doctoral Studies in a state-funded position of Doctoral Studies.

17. At least one month before the announcement of the open competition for admission to Doctoral Studies, the Vice-Rector for Research and Innovation of the Coordinating Institution, upon the proposal of the Committee, announces a competition for dissertation thematic areas and supervisors of doctoral students. The competition is organised by the Doctoral School of the Coordinating Institution and implemented by the Committee. The dissertation thematic areas (as well as the supervisors of doctoral students) selected by the Committee are listed in the protocol of the Committee which is submitted to the Doctoral School of the Coordinating Institution. The dissertation thematic areas of the Institutions are approved by a decree of the Vice-Rector for Research and Innovation of the Coordinating Institution prepared by the Doctoral School of the Coordinating Institution. The Doctoral School of the Coordinating Institution submits the decree to the Institutions, and they announce the selected Institution's thematic areas on their website.

18. Open competition for admission to Doctoral Studies is announced by the heads of the Institutions upon the proposal of the Committee. The information on admission to Doctoral Studies has to be announced on the Institution's website.

19. A candidate submits his/her application for participation in the open competition for admission to Doctoral Studies of the science field which is forwarded to head of the Institution, and to the Doctoral School. The application indicating the field(s) (no more than two fields) and the form of studies, the source of financing, as well as the preferred dissertation thematic area(s) in order of priority (no more than two areas) is submitted by a candidate accompanied with the following documents:

19.1. Copies of the Master's diploma or an equivalent higher education diploma and the diploma supplement (a certificate of the recognition of the qualification of higher education acquired abroad if the qualification of higher education acquired at a foreign institution was issued by the Centre for Quality Assessment in Higher Education or a University holding the right to conduct academic recognition of education and qualifications);

19.2. A curriculum vitae;

19.3. A recommendation by two scientists of the relevant science field;

19.4. A list of the candidate's research works and copies thereof, in the absence of such works – a research paper on the topic selected in accordance with the dissertation thematic area which the candidate plans to research;

19.5. Any other documents specified in the Rules for Admission to Doctoral Studies.

20. The main open competition for admission to Doctoral Studies is organised by the Doctoral School of the Coordinating Institution and implemented by the Committee.

21. The candidates are separately admitted to full-time or part-time state-funded and state non-funded Doctoral Studies of the Institutions under the competition procedure. At the Institution, the individuals invited to undertake Doctoral Studies sign the learning contracts in the format established by the Institution.

22. The selection criteria for admission to Doctoral Studies are as follows:

22.1. The applicant's grade point average or evaluations of the Master's or equivalent higher education studies and the thesis;

22.2. The relevance of scientific qualification and scientific publications, and the compliance of scientific experience with the dissertation thematic area;

22.3. An interview and any other criteria established by the Committee.

23. The selection criteria, their weight coefficients and competition score calculation are approved for each academic year in the Rules on Admission to Doctoral Studies, upon the proposal of the Committee.

24. According to the selection criteria, the Committee evaluates the candidates in grades and derives the priority ranking for the thematic areas in terms of the highest competition score. The lists

of the candidates of the Institutions and the decision regarding the offer to admit or not to admit a candidate to Doctoral Studies are finalised in the protocol of the Committee. The protocol of the meeting is transferred by the Committee to the Doctoral School of the Coordinating Institution which submits the protocol to the involved Institutions.

25. If the Committee determines that a candidate has completed an insufficient volume of subjects in the relevant science field or that his/her knowledge in particular subjects is insufficient, the Committee may assign additional subjects to be completed by the doctoral student during the years of Doctoral Studies. The doctoral student has to pay a fee set out by the Institution for the additional credits of the subjects.

26. In case there are available positions of Doctoral Studies after the signing of the learning agreements based on the quotas of the Institutions, an additional cycle of the competition may be organised by the Institution's Doctoral School under the same procedure.

27. An individual is admitted to Doctoral Studies by the order of head of the Institution. The order is drafted by the Institution's Doctoral School in accordance with the protocol of the Committee and a signed learning contract.

28. A meeting of the Committee is organised within the first two weeks of Doctoral Studies at the latest; during this meeting, the supervisor is nominated, the dissertation topic is outlined, and an academic department is assigned to the newly admitted doctoral students. Supervisors are approved for doctoral students, and an academic department is assigned under the procedure set out by the Institution.

29. The applicants who are not admitted to the state-funded places under the procedure of competition can choose state non-funded Doctoral Studies at the proposal of the Committee and pay the tuition fee for Doctoral Studies set out by the Institution.

30. Non-EU citizens admitted to Doctoral Studies have to obtain a residence permit to live in the Republic of Lithuania under the procedure established by the legislation.

31. The personal files of the applicants who were not admitted to Doctoral Studies and the personal files of the graduates of Doctoral Studies are stored at the Doctoral School of the Institution for one year; afterwards, they are stored under the procedure established by the Institution.

CHAPTER III SUPERVISION OF DOCTORAL STUDENTS

32. The studies and research of a doctoral student are supervised by the doctoral student's research supervisor (hereinafter referred to as Supervisor). A Supervisor must be an active scientist conducting research in the science field to which the doctoral student is admitted. A Supervisor may supervise the studies of up to five doctoral students simultaneously.

33. Upon the proposal of the Supervisor, consultants (no more than two) can be appointed for a doctoral student; they can be scientists of a different science field. The consultants of a doctoral student cannot be appointed earlier than in the second year of studies. A scientist representing a foreign institution can also be appointed as a Supervisor or a consultant of a doctoral student. In case the doctoral student's Supervisor is from a foreign institution, it is recommended to appoint a scientist from a Lithuanian institution as the doctoral student's consultant.

34. The Doctoral School of the Institution submits lists of Supervisors and academic departments of doctoral students for approval under the procedure set out by the Institution within the first two weeks of Doctoral Studies at the latest. The consultants of a doctoral student have to be approved under the same approval procedure as the Supervisor.

35. The Supervisor:

35.1. Prepares a doctoral student's draft work plan in cooperation with the doctoral student;

35.2. Proposes candidacies of consultant(s), if necessary;

35.3. Provides methodological assistance, supervises the doctoral student's research activities and constantly monitors the process of the doctoral student's Doctoral Studies; in case of any significant inconsistencies with the work plan, initiates the doctoral student's extraordinary performance evaluation;

35.4. Helps the doctoral student solve any organisational issues related to the studies, implementation of research and preparation of the dissertation;

35.5. Presents a conclusion on the outcomes of the doctoral student's studies and research, as well as a conclusion on the expediency of continuation of Doctoral Studies for each performance evaluation of the doctoral student;

35.6. Ensures high-quality preparation of the dissertation in cooperation with the doctoral student;

35.7. Prepares a detailed review of the completed doctoral dissertation before the end of the doctoral student's studies.

36. The doctoral student's consultant:

36.1. Provides consultations to the doctoral student on the issues related to a certain branch of the research field;

36.2. Organises the implementation of the research and experiments at other departments of the Institution or other institutions;

36.3. Prepares a detailed review of the completed doctoral dissertation before the end of the doctoral student's studies.

37. The Institution's department to which a doctoral student has been assigned:

37.1. Ensures conditions for the successful implementation of the individual plan of studies and research (work plan) for the doctoral student;

37.2. Monitors the doctoral student's progress in the course of Doctoral Studies;

37.3. Provides methodological assistance; encourages the doctoral student's mobility;

37.4. Assists the doctoral student in terms of acquisition of pedagogical experience in case he/she has chosen the academic career path;

37.5. Helps to pursue excellence in research throughout the entire period of Doctoral Studies;

37.6. Presents a conclusion on the outcomes of the doctoral student's studies and research, and the expediency of the continuation of Doctoral Studies for each performance evaluation of the doctoral student;

37.7. Upon the preparation of the dissertation text, organises the initial discussions on the doctoral dissertation under the procedure set out by the Institution; presents the Committee with conclusions on the doctoral dissertation's compliance with the applicable requirements.

38. In case there is need to replace the Supervisor or a consultant due to important reasons, this replacement process is coordinated, and the outcome is approved under the same procedure.

39. A doctoral student has the right to submit a reasoned application to the Doctoral School addressed to head of the doctoral student's Institution requesting for replacement of his/her Supervisor one year before the end of Doctoral Studies at the latest (in other cases, the decision is made by the Committee). Head of the doctoral student's Institution or his/her authorised person forwards the doctoral student's application to the Committee; the verdict has to be discussed and taken during its meeting within one month after the receipt of the application. If a doctoral student's application has been granted, the Committee takes into consideration the topic of the doctoral dissertation and offers candidacy of the new Supervisor to be approved by head of the doctoral student's Institution or his/her authorised person. If the application has been rejected by the Committee, the Supervisor continues the supervision.

CHAPTER IV DOCTORAL STUDENT'S WORK PLAN

40. The Supervisor, in cooperation with the doctoral student, prepares the doctoral student's draft work plan including the Doctoral Studies plan and the research plan. The deadlines for all the stages of work have to be scheduled in the work plan. The target research is set to begin with the beginning of the period of Doctoral Studies.

41. The volume of Doctoral Studies is 30 credits. A doctoral student studies at least 3 subjects. At least one subject (which may be interdisciplinary) has to be completed at a foreign research or educational institution or an event organised by foreign-associated educational structures.

At least one study subject of Doctoral Studies of the science field chosen by the Committee is mandatory to all the doctoral students of that particular science field. Credits can also be acquired at international summer/winter schools for doctoral students or for the doctoral student's partial studies abroad, as well as by completing the subjects of the development of key competencies (i.e., preparation of project proposals, issues of ethics and procedures, copyrights, communication skills, etc.). The decision regarding their inclusion is made by the Committee. Upon agreement with the Supervisor and the Committee, doctoral students include the planned study subjects into their individual study plans which make an integral part of the doctoral student's work plan. Each doctoral student prepares and coordinates this plan within the first month of Doctoral Studies.

42. A programme of Doctoral Studies of a science field can only consist of the modules certified by the Committee under the procedure set out by the Institutions. The Doctoral School of the Institution controls that only the certified study modules would be included in the individual study plans of doctoral students.

43. The lectures of Doctoral Studies are organised by heads of the academic departments of the Institutions whose employees are responsible for the delivered modules of Doctoral Studies. The timetable of the classroom classes of the modules of Doctoral Studies is announced in the Institution's information system.

44. A doctoral student's research plan consists of analysis of scientific literature and implementation of research (part of the research can be carried out at foreign high-level research centres), analysis of the obtained data, writing of scientific papers, delivery of scientific presentations at international conferences, preparation of the dissertation text, etc.

45. A doctoral student's work plan is approved by the Supervisor, by head of the academic department to which the doctoral student is assigned, and by the chairperson of the Committee of the science field.

46. A doctoral student conducts research in accordance with the approved work plan. The content, quality, scope and deadlines of the conducted research are evaluated during the doctoral student's performance assessment.

47. A doctoral student is provided with access to any equipment available at the Institutions' academic departments required for the research outlined in his/her research plan under the procedure set out by the Institutions. If some part of research cannot be conducted at the Institutions, the doctoral student can be directed to conduct research at another local or foreign research institution or enterprise.

CHAPTER V

ASSESSMENT OF DOCTORAL STUDENT'S KNOWLEDGE, ABILITIES AND SKILLS, AND PERFORMANCE EVALUATION

48. The studies of each subject end with an exam. It is recommended to organise examination for students during the regular examination sessions. Examinations can be conducted both orally and in writing. Written examinations are conducted under the procedure set out by the Institution. Evaluated papers containing answers of written examinations are submitted to the Doctoral School of the Institution along with the examination protocol. The examination results are entered and stored in the databases of the Institution's information system and in the doctoral student's file.

49. At the doctoral student's request, the credits for the previously taken examinations in the subjects studied under the programmes of Doctoral Studies may be included by the Committee.

50. A doctoral student is assessed at the academic department of the Institution and the Committee at the end of the autumn and spring semesters of each academic year. The academic department, with participation of the doctoral student and his/her Supervisor, assesses the implementation of the doctoral student's work plan and provides its conclusions to the Committee which gives the doctoral student the positive (thereby approving the continuation of Doctoral Studies and the specified work plan for the following academic year) or negative (thereby suggesting the termination of Doctoral Studies) evaluation. The Committee transfers the protocol on performance evaluation and the documents submitted by the doctoral student to the Doctoral School of the

Institution. A doctoral student who has received the negative evaluation is expelled from the Doctoral Studies by the order of head of the doctoral student's Institution. In case the doctoral student explicitly fails to implement his/her work plan, extraordinary performance evaluation may be initiated upon the proposal of the doctoral student's Supervisor or head of the doctoral student's department, as well as the Committee.

51. The doctoral student's deadlines for Doctoral Studies, research, examinations, preparation of the doctoral dissertation or other assessments can be postponed due to important reasons (illness, pregnancy and childbirth, etc.) for a period not exceeding 3 months. Requests of the doctoral students for the postponement of the deadlines with supporting documents are submitted to the Doctoral School of the doctoral student's Institution. No postponement can influence the duration of Doctoral Studies. If the deadlines for assessments are postponed due to important reasons, the payment of the doctoral student's scholarship (support for studies) is suspended until the doctoral student has obtained successful assessment for the scheduled activities.

CHAPTER VI

DOCTORAL STUDENT'S VACATION, TRIPS, SCHOLARSHIPS (SUPPORT FOR STUDIES), APPEALS, OTHER CONDITIONS

52. The vacation period of doctoral students covers July and August.

53. The scholarship (support for studies) is the amount determined by the Government of the Republic of Lithuania which is paid to the individuals admitted to full-time state-funded Doctoral Studies by the Institution throughout the period of their studies. If the studies are temporarily interrupted and a student resumes Doctoral Studies on the day other than the first or the last day of the month, the calendar days of the incomplete month are included in the duration of Doctoral Studies, and the doctoral student receives the corresponding part (share) of the scholarship (support for studies).

54. Upon considering important personal or other reasons, after coordination with the doctoral student's Supervisor, head of the academic department, and the Doctoral School of the Institution, a doctoral student may be permitted to interrupt studies temporarily for the total period not exceeding one year under the procedure set out by the Institution.

55. In case of a doctoral student's illness during the attestation or examination session, the doctoral student or his/her close relatives have the duty to notify the Doctoral School of the Institution within three working days at the latest and submit the documents proving his/her illness. Based on these documents, the doctoral student is permitted to postpone the deadlines for assessment. An illness does not influence the duration of Doctoral Studies.

56. A doctoral student may request an academic leave of absence due to illness, pregnancy, childbirth and parental leave under the procedure set out by the Institution.

57. A doctoral student who fails to begin his/her studies on time or submit a work plan under the established procedure, or who fails to resume Doctoral Studies within 15 calendar days after the interruption of studies, academic leave of absence, trip, illness, etc. without a valid reason is expelled from Doctoral Studies by the order of the Rector. A doctoral student can also be expelled from Doctoral Studies due to behaviour incompatible with the standards of the ethics of the academic community.

58. A doctoral student can conduct research or complete a part of studies at other local or foreign institutions. This period is included in the total period of Doctoral Studies, and the doctoral student receives full scholarship (support for studies). The doctoral student takes such trips under the procedure set out by the Institution based on the submitted application in the specified format, approved by the doctoral student's Supervisor, head of the academic department, and the Doctoral School of the doctoral student's Institution. The expenses of the trip(s) may be covered under the projects and programmes administered by the Research Council of Lithuania, the department of the doctoral student's Institution or the Institution's funds for students, the host institution or other funds. If funding has been allocated, the documents supporting the incurred expenses have to be submitted to the Institution's accountancy within three working days after the return from the trip.

59. Doctoral students can be employed in the academic departments of the doctoral student's Institution as full-time or part-time employees with the consent of their Supervisor. Each year, the doctoral student can have pedagogical workload as long as it complies with the needs and capacities of the academic department. Doctoral students receive remuneration for their pedagogical workload under the procedure set out by the Institution.

60. The expenses related to the dissertation defence (the expenses for printing and sending out the dissertation, remuneration for the work of the members of the Dissertation Defence Board) of the doctoral students who defend dissertations before the end of the term of their Doctoral Studies or within one year after the end of the studies are financed from the funds of the doctoral student's Institution.

61. A doctoral student (candidate) can submit a reasoned appeal or complaint regarding the decisions made with regard to him/her on the issues of Doctoral Studies under the procedure set out by the Institution when the decision-making (for example, during the assessment of learning outcomes, performance evaluation, etc.) includes possible violation of the academic ethics, procedures and errors, as well as possible violation of the doctoral student's rights and legitimate interests, refusal to award the doctoral degree, rejection of the external student's or doctoral student's application for dissertation defence and other issues related to the implementation of Doctoral Studies. A reasoned appeal or complaint regarding the possible violations or decisions made during the process of Doctoral Studies, addressed to head of the Institution, can be submitted by any employee of the doctoral student's Institution. Head of the doctoral student's Institution forwards the received appeal or complaint for examination to the Committee and the respective Institution's departments, or to specially formed structures/bodies. Any appeal or complaint of the employee of the doctoral student's Institution has to be processed, and the decision has to be made within 15 calendar days after their receipt.

CHAPTER VII

PREPARATION AND EXAMINATION OF THE DOCTORAL DISSERTATION, ISSUING OF THE DOCTORAL DIPLOMA

62. A research doctoral dissertation, as a coherent monograph (except for the case indicated in Paragraph 63), consists of the text of the dissertation (written in the Lithuanian language or in the English language) and an abstract (in the Lithuanian language or in the English language, in a language different than the dissertation's language). The dissertation is submitted with the list of the papers and scientific conferences which presented the outcomes of the dissertation's research. The dissertation shall contain description of the life, research and creative activities of the individual who submits the dissertation for defence (hereinafter referred to as candidate) – i.e., the *curriculum vitae*. Copies of or references to the candidate's scientific publications on the dissertation topic, or references thereof, are attached separately. A scientific monograph prepared by the candidate without cooperation with co-authors can also be submitted for defence as a doctoral dissertation. The monograph's abstract shall also be submitted. In this case, other scientific publications are submitted if they are necessary for the presentation of the dissertation topic.

63. A dissertation based on a set of scientific papers can also be submitted for defence as a research doctoral dissertation. In this case, a dissertation has to include a review in the volume of at least 1 quire, an abstract of approximately 0.5 quire in the Lithuanian language or in a foreign language (in the Lithuanian language or in the English language, that is, in a different language than the review language) as well as copies of the candidate's scientific papers on the dissertation topic. The main parts of the dissertation are as follows: an introduction, a literature review, a review of the papers, conclusions, an abstract, a list of references, copies of the papers, brief information about the author. The key research outcomes have to be published by the candidate at least in four papers (of which, the candidate is the first co-author or is listed as the corresponding author at least in two of the papers), published or accepted for publishing (with a digital object identifier (hereinafter referred to as *DOI*)) in international scientific publications with the impact factor in *CA WoS* database which are in Q1 or Q2 quartile at the time of the publishing of the paper. The author of the dissertation has

to submit written consents of the publishers of the papers holding the copyrights to the papers and consents of the main co-authors and authors of the papers listed as the corresponding authors so that to upload copies of the papers used in the dissertation to the Institution's Doctoral School (in individual cases, the Committee decides regarding consents of the co-authors). If a dissertation based on a set of scientific papers is defended, these papers cannot be used in the defence of any other dissertation.

64. A research doctoral dissertation (hereinafter referred to as *dissertation*) has to be an original research work including an introduction with a substantiated scientific problem, defined relevance of the work, its objective and tasks to be solved, novelty of the work and statements of the dissertation to be defended; a dissertation shall summarise the research conducted by other scientists on the dissertation topic and their outcomes; a dissertation shall provide the methodology and/or methods of the work, the credibility of the obtained outcomes, and the relation to the outcomes of other scientists, the reliability of the obtained results and their relation to the outcomes of other researchers, and conclusions. The text of the dissertation is written in the Lithuanian language or in the English language; if the Committee agrees, a dissertation can be written in a language other than Lithuanian or English. The volume of a dissertation (except for dissertations based on a set of scientific papers) is from 4 to 10 quires (one quire is 40 000 characters with spaces). A dissertation abstract has to include the definition of the scientific problem analysed in the dissertation, the presentation of the objectives and tasks of the research work, the scientific novelty of the work, the research methodology, the key outcomes and the conclusions based on the outcomes defended by the doctoral student, and brief information about the candidate. A dissertation abstract (its recommended volume is in-between 0.5 and 1 quire) is prepared in the Lithuanian language or in the English language (i.e., other than the language of the text of the dissertation). If a dissertation is written in a language other than Lithuanian or English, two abstracts are prepared (both in the Lithuanian and English languages). A dissertation and its abstract have to be written in the correct (i.e., error-free) language.

65. The doctoral student's Supervisor and consultant(s), if any, have to be indicated in the dissertation. In case of the replacement of a doctoral student's Supervisor, any previous Supervisor(s) and the period(s) of their supervision have to be indicated. Examples of the title page and the second page of a dissertation are provided in Appendix 1 to the Regulation.

66. A doctoral student is allowed to submit a dissertation for defence on condition that he/she:

66.1. Has passed all the examinations scheduled in the doctoral student's work plan;

66.2. Has published the key outcomes of his/her research in at least two papers published either with DOI in peer-reviewed scientific journals or a scientific monograph which have not been provided in any already defended dissertations. The outcomes of the doctoral student's research are published:

66.2.1. In the areas of humanities and social sciences – at least in two papers in peer-reviewed scientific journals; one of them is published in an international publication with more than a half of the members of its editorial board being representatives of the country other(s) than the one the publication is published, or scientific publications with the impact factor in the *CA WoS* or *Elsevier Scopus (Scopus)* databases, or a scientific monograph;

66.2.2. In the areas of physical sciences and technologies – at least in two papers in international scientific journals with the impact factor in the *CA WoS* database;

66.3. Has presented the outcomes of his/her research in at least two international scientific events;

66.4. Has completed at least a three-month traineeship at foreign research and educational institution(s) (recommended).

67. A doctoral student presents the prepared dissertation during the meeting of the academic department of the doctoral student's Institution, with participation of the Supervisor and consultants (if any). The dissertation and the published scientific papers, the skills and the achieved scientific qualification of the doctoral student are evaluated by the academic department under the procedure set out by the Institution; the conclusion is submitted to the Committee. If a doctoral student submits

the dissertation prior to the end of Doctoral Studies but fails to defend it on time, the dissertation may be defended under the usual procedure within 12 months after the formal completion date of Doctoral Studies. If a dissertation is not defended within this period, it is defended externally following the requirements of Chapter VIII of this Regulation.

68. A doctoral student submits an application for dissertation defence addressed to head of the Institution at which he/she wants to defend the dissertation and also submits the application to the Doctoral School. The following documents are to be attached to the application:

68.1. Copies of the Master's diploma (or equivalent higher education) and its supplements;

68.2. A description of the candidate's biography, scientific and creative activities – *curriculum vitae*;

68.3. A certificate on the completed subjects or certified copies of the protocols on the examinations passed according to the study programme of Doctoral Studies (they are prepared by the Doctoral School according to the documents in the doctoral student's file and the records in the databases);

68.4. Author's guarantee for the originality of the defended dissertation (examples are provided in Appendix 2 to the Regulation);

68.5. A list of the published scientific works related to the dissertation topic and copies thereof (if the work has not been published yet, it is required to include a certificate from the editorial office confirming that the publication is pending);

68.6. A printed doctoral dissertation;

68.7. Reviews by the Supervisor and consultants (if any) (if the reviews have been submitted to the Doctoral School, there is no need to submit any further copies);

68.8. A protocol of the dissertation's evaluation, including the conclusion in the format stipulated by Paragraph 65, by the academic department at which the dissertation has been prepared (if a protocol was submitted to the Doctoral School during the period of Doctoral Studies, there is no need to submit any further copies); if a dissertation is submitted by a doctoral student who is not a student of the University, the dissertation's evaluation protocol from the institution at which the dissertation has been prepared with a proposal for defence, signed by head of the institution, has to be submitted.

69. The Doctoral School of the doctoral student's Institution verifies the compliance of the submitted documents with the established formal requirements and forwards the application with appendices to head of the doctoral student's Institution. In case the doctoral student's Institution is not the Institution at which the student wants to defend the dissertation, head of the doctoral student's Institution forwards the supporting documents to head of the Institution at which the doctoral student wants to defend the dissertation.

70. Head of the Institution at which the student wants to defend the dissertation forwards the doctoral student's application and the submitted documents listed in Paragraph 68 to the Committee of the science field. The doctoral student (the candidate) or the Doctoral School of the Institution at which the student wants to defend the dissertation forwards these documents to the Committee. The expenses of the defence procedure of those doctoral students who represent an Institution which cannot award a doctoral degree are covered by the doctoral student's Institution.

71. The chairperson of the Committee assembles a meeting of the Committee within two weeks after the receipt of the documents at the latest, except for July and August; during this meeting, two dissertation opponents who are competent in the dissertation topic are appointed (thereinafter they are referred to as *opponents*).

72. The chairperson of the Committee assembles an open meeting with the participation of the doctoral student (the candidate) and his/her Supervisor within one month after the receipt of the documents for dissertation defence at the latest. The Committee hears the doctoral student's (candidate's) presentation of his/her dissertation work (at least 20 minutes) which covers the objective, the tasks, the novelty of the scientific work along with its key outcomes, statements and conclusions; the reviews of the presented dissertation by the appointed opponents (written reviews of the opponents have to be submitted to the Institution's Doctoral School); the doctoral student's

(candidate's) answers to the remarks of the opponents; and the dissertation review provided by the Supervisor of the doctoral student (the candidate).

73. The Committee assesses, with objective reasoning, the objectives and tasks of the dissertation, the scientific novelty, relevance and originality of the work, the review of the research conducted in Lithuania and abroad in the field of the defended dissertation, the described research methodology, the reliability and validity of the obtained outcomes, the validity of the statements of the defended conclusions and their compliance with the essence of the research, the compliance of the published scientific papers and the provided research outcomes with the fundamental statements of the defended dissertation, the doctoral student's contribution to the scientific publications on the dissertation topic.

74. The Committee may conclude that:

74.1. The dissertation has been prepared correctly, it complies with the requirements of Chapter IV of the Regulation; the doctoral student (the candidate) has met the requirements of Chapter IV of the Regulation, and the dissertation may be submitted for defence upon taking into consideration the remarks of the opponents and the members of the Committee;

74.2. The dissertation requires corrections. The dissertation is then returned to the doctoral student (the candidate). A discussion on the corrected dissertation begins according to the requirements listed in Paragraph 71 and/or the relevant subsequent paragraphs;

74.3. The dissertation does not meet the requirements.

75. If the Committee decides that the dissertation can be submitted for defence, the Committee:

75.1. Substantiates the decision to defend the dissertation in a closed meeting of the Board in exceptional cases;

75.2. Prepares a draft of the structure of the Dissertation Defence Board consisting of at least three members and appoints one of its members as the chairperson;

75.3. Collects the agreements of the preliminary members of the Board (with the assistance of the Institution's Doctoral School) and the data proving their compliance with the qualification requirements for the members of the process of Doctoral Studies (lists, certificates, etc.);

75.4. Confirms the list of the institutions which will be sent a notification about the intended defence of the doctoral dissertation according to the thematic area of the prepared dissertation;

75.5. Confirms a date for the dissertation defence.

76. A dissertation is defended in the open meeting of the Board (except for the cases stipulated in Paragraph 75.1) following the Regulation on the Defence Board for Research Doctoral Dissertations (Appendix 3 to the Regulation). A dissertation defence can be held in Lithuanian or in another language. The language of the dissertation defence is determined by the Committee of Doctoral Studies. The chairperson of the Board conducts the meeting. The meeting is legitimate if more than half of the members of the Board are present (including the ones participating by means of teleconferencing). If the Board consists of 3 members, the meeting is legitimate if all of its members are present (including the ones participating by means of teleconferencing). The meeting is based on the principles of impartiality, transparency, tolerance, correctness and legitimacy, as well as the personal responsibility of the members of the Board for their activities and decisions. The reviews of the dissertation received from the members of the Board who are absent in the meeting and other received reviews are read during the meeting.

77. The candidate presents the main outcomes and conclusions of his/her work, indicates his/her input into the publications presented in the dissertation. The members of the Board reasonably assess the scientific level of the dissertation, the novelty and originality of its outcomes, the reliability and validity of the conclusions, indicate the weaknesses and inaccuracies of the work and evaluate the candidate's scientific competence during the defence. The candidate answers the provided questions and comments on the outlined remarks. During the discussion, the candidate must defend the outcomes of his/her scientific work and prove his/her scientific competence.

78. After the discussions with the candidate, the members of the Board vote for/against the award of the doctoral degree to the candidate. The members of the Defence Board who participate

via teleconferencing vote as well. The decision to award the doctoral degree is made if more than half of all members of the Board vote for it, except for the cases when the Board consists of 3 members. In this case, the decision is made if all the three members vote for it. If the decision not to award the doctoral degree is made, the arguments of such a decision are specified in the voting protocol. The voting protocol is signed by all the members of the Defence Board participating in person in the meeting.

79. The members of the Board can only be those scientists who have no joint publications with the candidate. No conflict of interests can be possible between the members of the Board and the candidate or his/her Supervisor (or the consultant(s) if the dissertation is defended externally). No more than half of the members of the Board can have any joint publications with the doctoral student's Supervisor (or the consultant(s) if the dissertation is defended externally) within the last five years. At least two members of the Board have to be the scientists from other institutions (it is advisable to have at least one member of the Board representing a foreign research and educational institution). The candidate's Supervisor and research consultant (the consultant if the dissertation is defended externally) cannot be members of the Board. Two members of the Board may represent other science fields if the work comprises two science fields or if it is necessary for comprehensive assessment of the defended work.

80. Each member of the Board has to analyse the submitted dissertation comprehensively and indicate its positive and negative aspects in their review. The scientific novelty, relevance and originality of the dissertation have to be evaluated; the opinion on the compliance of the defended work with the requirements for doctoral dissertations has to be stated. Each member of the Board has to submit a written review of the dissertation to the Doctoral School of the doctoral student's Institution within five working days before the defence at the latest. The candidate has a right to get acquainted with the submitted reviews.

81. A dissertation containing information constituting a state, professional or commercial secret can be defended in a closed session.

82. Upon the examination of the documents, the Doctoral School of the Institution at which the dissertation is defended prepares a draft order to be signed by head of the Institution at which the dissertation is defended which approves the Board, and the date of the dissertation defence.

83. After head of the Institution at which the dissertation is defended has signed this order:

83.1. The Doctoral School of the Institution at which the dissertation is defended organises the publishing of the required number of copies of the dissertation;

83.2. At least one month before the dissertation defence, the Doctoral School of the Institution at which the dissertation is defended sends one copy of the dissertation to the members of the Board along with a notification on the dissertation defence to the addressees indicated in Paragraph 75.4 of the Regulation;

83.3. The Doctoral School of the Institution at which the dissertation is defended announces the dissertation defence on the websites of the doctoral student's Institution and the Research Council of Lithuania. The announcement includes the name and surname of the candidate, the institution at which the doctoral dissertation has been prepared, the title of the dissertation, the place and time of the defence, the Supervisor, the members of the Board, their science fields and institutions;

83.4. A copy of the dissertation is transferred to the libraries of the Institutions.

84. The documents of the Board are managed by the Doctoral School of the Institution. All the defence documents, including the meeting protocol with the audio recording of the meeting and the decision of the Board stating whether the candidate is to be awarded the doctoral degree, are handed over to the Doctoral School of the Institution after the dissertation defence. Based on this protocol, the Doctoral School of the Institution prepares a doctoral diploma.

85. Head of the Institution and the chairperson of the Defence Board sign the diploma after receiving the decision of the Board to award the doctoral degree.

86. If the Board decides that the doctoral degree is not to be awarded, an amended and/or supplemented dissertation can be submitted for defence after one year at the earliest. In such a case, the doctoral degree is awarded externally according to the requirements of Chapter VIII of the

Regulation. In case a fact of scientific dishonesty (plagiarism or other violations of academic ethics and procedures) has been detected, the dissertation cannot be defended.

87. A registered doctoral diploma is awarded to the scientist after the dissertation has been published in the eLABa repository.

88. The Institution of joint Doctoral Studies informs the Research Council of Lithuania about the defended dissertation under its established procedure within 20 working days after the dissertation defence meeting. The notification to the Council specifies the reasons why the dissertation was not or could not be defended (if this is the case). Within two weeks after the defence of the dissertation, one copy of the defended dissertation is submitted to Martynas Mažvydas National Library of Lithuania, and the dissertation is published in the eLABa repository, except for the case specified in Paragraph 75.1.

89. The Institution may revoke its decision to award the doctoral degree:

89.1. If a fact of academic dishonesty has been detected;

89.2. If the doctoral degree has been awarded in violation of the Regulation on Research Doctoral Studies or other legislation regulating the award of the doctoral degree;

89.3. If the Ombudsman for Academic Ethics and Procedures has made a decision authorising this action. The Ombudsman for Academic Ethics and Procedures can authorise the University to revoke a decision to award the doctoral degree before the Regulation has come into force.

CHAPTER VIII OBTAINING A DOCTORAL DEGREE EXTERNALLY

90. An individual meeting the requirements listed in Chapter V of the Regulation may obtain the doctoral degree externally.

91. An application for external dissertation defence addressed to the Rector of the Institution is submitted to the Doctoral School of the Institution with the documents listed in Chapter V of the Regulation. If the Doctoral School establishes that the submitted documents comply with the requirements of the Regulation on Research Doctoral Studies, it forwards the application with its appendices to the Rector of the Institution.

92. The Rector of the Institution forwards the application with its appendices to the Committee which appoints at least two opponents for the assessment of the manuscript of the dissertation. The Committee assembles a meeting with participation of the external student and the appointed opponents within 3 months after the submission of the application at the latest. During the meeting, the Committee analyses the submitted documents and decides whether the manuscript of the dissertation meets the requirements for research doctoral dissertation according to the requirements of Paragraph 73 of the Regulation.

93. If the Committee decides that the submitted or corrected dissertation of an external student may be recommended for defence, the Committee:

93.1. Assigns the external student to the academic department of the Institution;

93.2. Proposes a consultant for the external student for approval (a consultant can be a scientist of the same science field); the consultant shall perform the functions of the external student's Supervisor; if the external student previously studied in Doctoral Studies but failed to submit the dissertation for obtaining the doctoral degree, the Committee may appoint the former Supervisor of the doctoral student or another person as the consultant;

93.3. Makes a decision regarding the inclusion of the examinations passed by the external student during Doctoral Studies; establishes the examinations of Doctoral Studies that need to be taken and the deadline;

93.4. Sets the deadline for the preparation and defence of the dissertation which cannot exceed one year after the Committee has made the positive decision.

94. The examinations of the external student are organised following the requirements of Chapter V of this Regulation, and the dissertation is examined and defended following the requirements of Chapter VII (Paragraph 71 and subsequent applicable paragraphs) of this Regulation.

95. If the Committee decides that the dissertation manuscript or the published scientific monograph does not meet the requirements applicable to the doctoral dissertation and cannot be prepared for defence within one year after the submission of the application, the external student may submit an appeal which is processed under the procedure stipulated by Paragraph 61 of the Regulation. In case the Committee's negative decision is confirmed, the external student may submit an application for dissertation defence repeatedly but no sooner than after one year after the date of the Committee's verdict.

96. The external student covers only the expenses of the Institution directly related to the acquisition of the doctoral degree.

CHAPTER IX PROCEDURE OF THE WORK OF THE COMMITTEE

97. The activities of the Committee are based on the collegial discussion of the issues, principles of impartiality, transparency, tolerance and legitimacy, as well as personal responsibility of the members of the Committee for their actions.

98. The meeting secretary elected from the members of the Committee processes the documents of the Committee meeting and signs the meeting protocols.

99. The Committee's decisions are legitimate if at least two thirds of all the members of the Committee vote for them. A meeting for the Committee's discussion on a certain issue can be organised via telecommunication. The Committee's members express their opinion on the discussed issue and vote via email or other means of telecommunication. The Committee makes the final decision by voting: if the votes are distributed equally, the chairperson of the Committee has the casting vote. The protocols of the Committee's meeting are prepared in two copies: one copy is stored at the Doctoral School for 6 years; the other copy is stored at the Committee, and is afterwards stored under the procedure set out by the Coordinating Institution.

100. The signed protocols of the Committee meeting are delivered to the Doctoral School of the Coordinating Institution within 5 working days after the meeting of the Committee.

101. The chairperson of the Committee summons its meetings and organises its work; in case of his/her absence, a member of the Committee is appointed as his/her deputy. The chairperson:

101.1. Examines the received documents in advance or authorises another member of the Committee to examine them;

101.2. Chairs during the meeting(s) of the Committee;

101.3. Signs the documents of the meeting(s) of the Committee.

102. A member of the Committee:

102.1. Reads the received documents in advance;

102.2. Expresses his/her personal opinion on the discussed issue(s) during the meeting;

102.3. Performs other assignments of the chairperson of the Committee.

103. If some members of the Committee are foreign scientists or if doctoral students from foreign countries are present at the meeting, the need for translation to the Lithuanian or any other language is determined by the Committee. If a translation is required, it is organised by the chairperson of the Committee.

104. In the cases not stipulated by this Regulation and other legislation, the decisions related to the process of Doctoral Studies are made by the Committee.

CHAPTER X PROCEDURE FOR THE STORAGE OF THE DOCUMENTS OF DOCTORAL STUDIES

105. A personal file of the doctoral student compiled by the doctoral student's Institution is stored at the Doctoral School of the doctoral student's Institution during the period of Doctoral Studies and for two years after the graduation; afterwards, it is transferred to the archive of the

doctoral student's Institution under the established procedure. The file has to include the following documents:

105.1. The application for admission to Doctoral Studies, including the appendices specified in the Regulations on the Admission to Doctoral Studies;

105.2. The documents of the admission to Doctoral Studies;

105.3. The documents of the appointment of the doctoral student's Supervisor and consultant(s);

105.4. The doctoral student's work plan;

105.5. The documents of the doctoral student's performance evaluations;

105.6. The documents of the postponement of the deadlines of the doctoral student's work plan, the documents of the interruption of studies/provision of the academic leave of absence;

105.7. The protocols of examinations of the doctoral student's studies;

105.8. The documents of the graduation from or termination of Doctoral Studies.

106. The personal file of the individual who has defended the doctoral dissertation at the Institution is stored at the Institution's Doctoral School for two years; afterwards, the personal file is transferred to the archive of the Institution under the stipulated procedure. The file has to include the following documents:

106.1. The application for dissertation defence with the supporting documents and the proposal for defence provided by the Committee;

106.2. The documents of the assembly of the Board;

106.3. A protocol of the dissertation defence meeting;

106.4. The Board's decision on the award of the doctoral degree;

106.5. A copy of the doctoral diploma.

107. If an individual has completed doctoral studies and acquired the doctoral degree at the Institution, the documents listed in Paragraphs 105 and 006 of this Regulation may be stored in one file.

REGULATION ON THE BOARD FOR DEFENCE OF THE DISSERTATION OF THE SCIENCE FIELD

1. This Regulation lays down the work procedures for the Board for Defence of the Dissertation of the Science Field (hereinafter – Board) assembled in accordance with the Regulations on Research Doctoral Studies approved by Order No. V-739 of the Minister of Education, Science and Sport of the Republic of Lithuania of 18 May 2020.

2. The Board's documents are managed and the meeting for the dissertation defence is organised by the Doctoral School of the institution of joint Doctoral Studies.

3. The work of the Board is organised by the chairperson of the Board. The chairperson:

3.1. Examines the personal file of the candidate who has applied to defend the dissertation in advance and makes sure that the file and all the documents of the meeting (ballot papers, a blank of the voting protocol and other relevant documents) have been prepared;

3.2. Examines the received reviews which have to be presented during the Board's meeting, or assigns this work to another member of the Board;

3.3. Ascertains that everything has been properly prepared for the meeting (for the audio recording of the meeting, for the demonstration of visual material and the translation of the meeting, if needed);

3.4. Chairs during the Board's meeting (if the appointed chairperson of the Board is unable to participate in the defence meeting, the members of the Board elect one of the members who will perform the chairperson's functions at the beginning of the meeting);

3.5. Signs the documents of the meeting of the Board.

4. A member of the Board:

4.1. Examines the dissertation submitted for defence in advance and assesses whether it is an original scientific work which includes a summary of the research work conducted by the doctoral student on the problem of the science field and whether its content meets any other requirements applicable to a doctoral dissertation;

4.2. Assesses whether the candidate's scientific publications have been published in scientific journals and the main research outcomes have been presented in these publications.

5. The meeting of the Board is public (in case of a closed meeting, the participants only include the members of the Board, the candidate, his/her supervisor and consultants; all the participants of the meeting sign a declaration of the confidentiality of information). The proceeding of the meeting is as follows:

5.1. The chairperson of the Board makes sure that more than a half of the members of the Board, including the ones participating by means of teleconferencing, participate in the meeting (if the Board consists of 3 members, the meeting is legitimate when all the three members participate), and that the members who do not participate in the meeting have submitted their written reviews on the dissertation; afterwards, he/she informs the participants of the meeting, announces the quorum, and presents the file of the candidate;

5.2. The candidate introduces the problem of the dissertation, its objectives, tasks, the obtained research data, the main outcomes and the conclusions of his/her work;

5.3. The candidate's supervisor and consultants are provided with an opportunity to speak;

5.4. The chairperson of the Board announces a scientific discussion which is started by the members of the Board. They have to reasonably assess the dissertation's scientific level and the

validity of the outcomes, to estimate whether the dissertation and candidate's publications comply with the requirements of the Regulations. The members of the Board have to pose questions to the candidate;

5.5. The chairperson or his/her appointed member of the Board reads aloud any additional reviews on the dissertation (if available) or, upon receiving agreement of the members of the Board, introduces the remarks and conclusions formulated in the reviews, and the candidate has to provide a reasoned response to the remarks;

5.6. The guests are provided with an opportunity to speak (in case of an open meeting); the candidate has to be provided with an opportunity to speak after each speech;

5.7. The candidate makes the final speech after the scientific discussion;

5.8. At the end of the discussion, the chairperson of the Board asks the participants of the meeting to leave the meeting room, except for the members of the Board. When the members of the Board stay alone on the premises, they vote:

5.8.1. The chairperson of the Board distributes the ballot papers to the participating members. After the voting of the directly participating members of the Board, the members of the Board participating by means of teleconferencing inform the chairperson of the Board about their decision via electronic means of communication; the chairperson marks the vote of the member participating by means of teleconferencing in a separate ballot and signs it;

5.8.2. The chairperson of the Board fills in the voting protocol after the voting; the members of the Board have a right to verify the voting results;

5.8.3. The members of the Board confirm the voting results under the procedure of the open voting and sign the voting protocol and the Board's decision on the award of the doctoral degree to the candidate.

5.9. The chairperson of the Board reads the Board's decision to the participants of the meeting and announces the end of the meeting.

6. When the meeting is over, the chairperson of the Board returns all the documents of the dissertation defence to the Doctoral School of the institution.

7. The chairperson of the Board reviews and signs a protocol of the meeting prepared according to the audio recording of the meeting.
