

INSTITUTE OF CIVIL ENGINEERING AND ARCHITECTURE

Name of the department	Name of the position	Part of FTE	Science field	Required competences and experience
Composite and Finishing Materials Laboratory	Senior Researcher	1,0	T002 Civil Engineering	<p>Doctor of Science in the science fields of Civil Engineering or Materials Engineering.</p> <p>Experience of research activities: experience and ability to conduct the research of the forecasting of durability and applicability of the building materials and experimental development works, apply the research methods and the assessment requirements of building materials. To publish the research results in scientific journals and international scientific conferences.</p> <p>Experience of supervision of the students' theses: theses of the Bachelor's, Master's and Doctoral students.</p> <p>Additionally required experience and competences: experience of the submission of proposals for the external funding of research and R&D.</p>
Building Physics laboratory	Researcher	1,0	T002 Civil Engineering	<p>Doctor of Science in the science field of Civil Engineering.</p> <p>Experience of research activities: experience and ability to conduct the research of the acoustics of buildings and sound insulation of construction elements and experimental development works, have good knowledge of the requirements for assessment of the acoustic characteristics of buildings and construction elements. To publish the research results in scientific journals and international scientific conferences.</p> <p>Additionally required experience and competences: experience of participation in international research projects.</p>
Centre of Territorial Planning	Researcher	1,0	H003 History of Art	<p>Doctor of Science in the science field of History of Art.</p> <p>Experience of research activities: Experience and ability to conduct the urban research and experimental development works, to publish the research results in the high-level scientific publications and scientific monographs. Experience of preparation of the project proposals for research financing and project execution.</p> <p>Additionally required experience and competences: ability to attract the external funds for R&D activities.</p>
