TRAINING EXPERIENCE

WWW.TRAININGEXPERIENCE.ORG

Who we are?

Training Experience is the first European platform to integrate all parties (companies, students and universities) involved in the personnel selection for internships and/or first job, helping to improve the employability of young people.

With over six years of experience we have managed to adopt the platform to the needs of universities, always complying with the European quality standards.

The platform reduces the bureaucratic burden since it automatically generates the necessary documentation. We pride ourselves with a 98% success rate in obtaining visas and in other governmental processes.

What we offer?

1) Remunerated offers for your students and fresh graduates.

In 72% of the cases, interns were hired after the internship.

2) An integrated management platform for students and coordinators.

3) Management of visas and residence permits.

4) Assistance in the destination city:
registration, accommodation, etc.

5) Statistics of employment trends.
